

Chapter 1

Development Methodology and Project Timeline

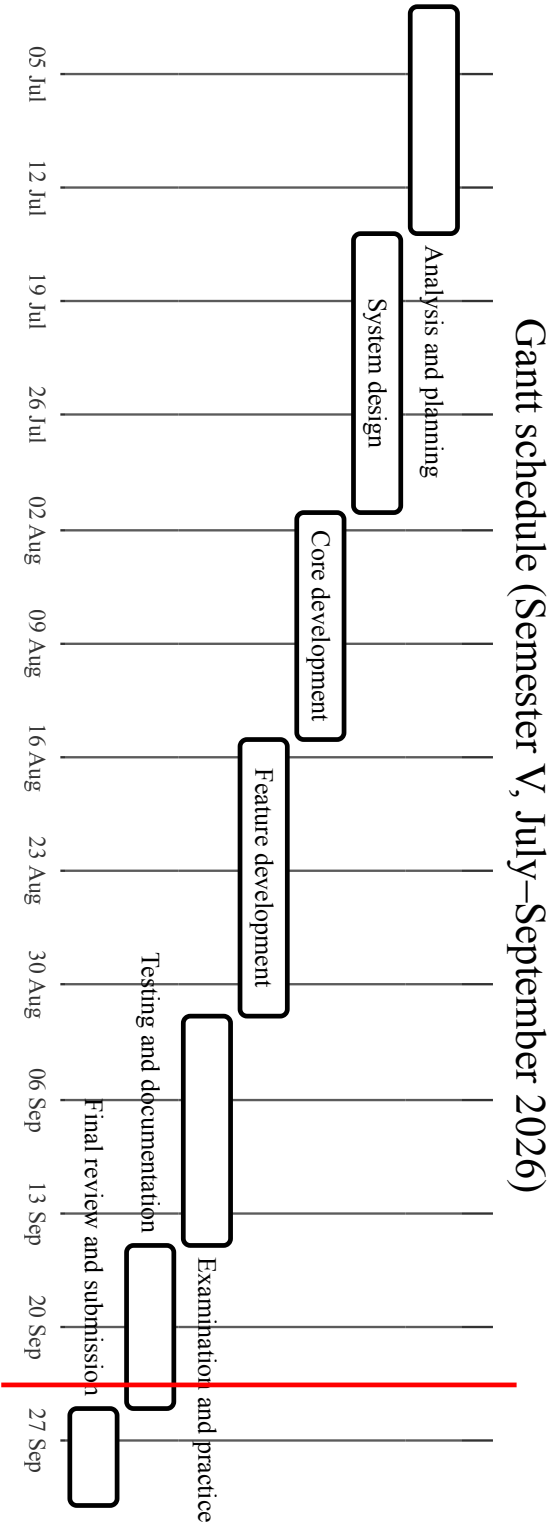

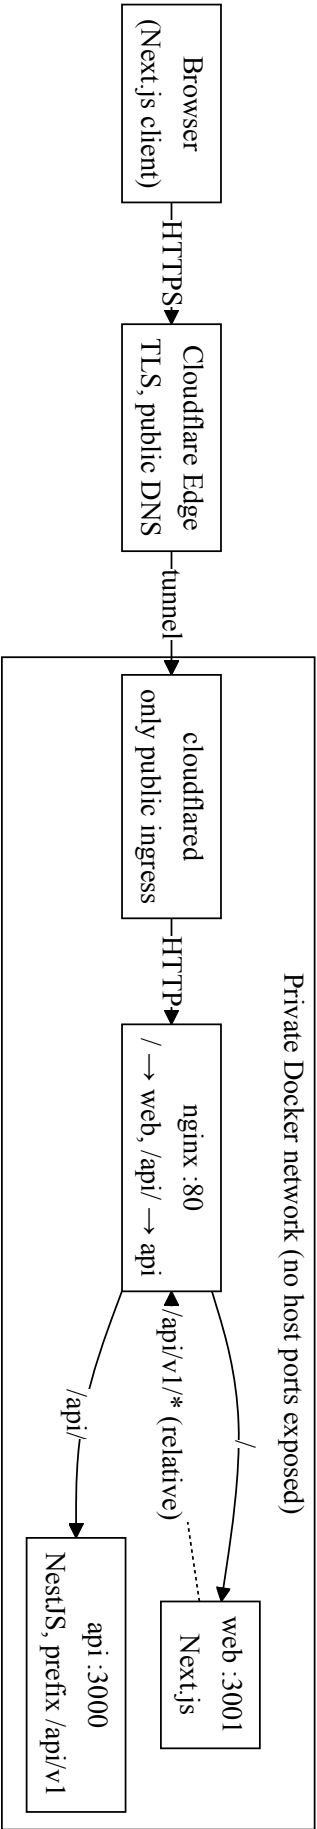

Figure 1.1. Gantt chart of the seven project phases (July–September 2026).

Chapter 2

System Architecture

Catlium EduTech — System Architecture: Public Ingress and Routing

Catlium EduTech — System Architecture: Internal Services

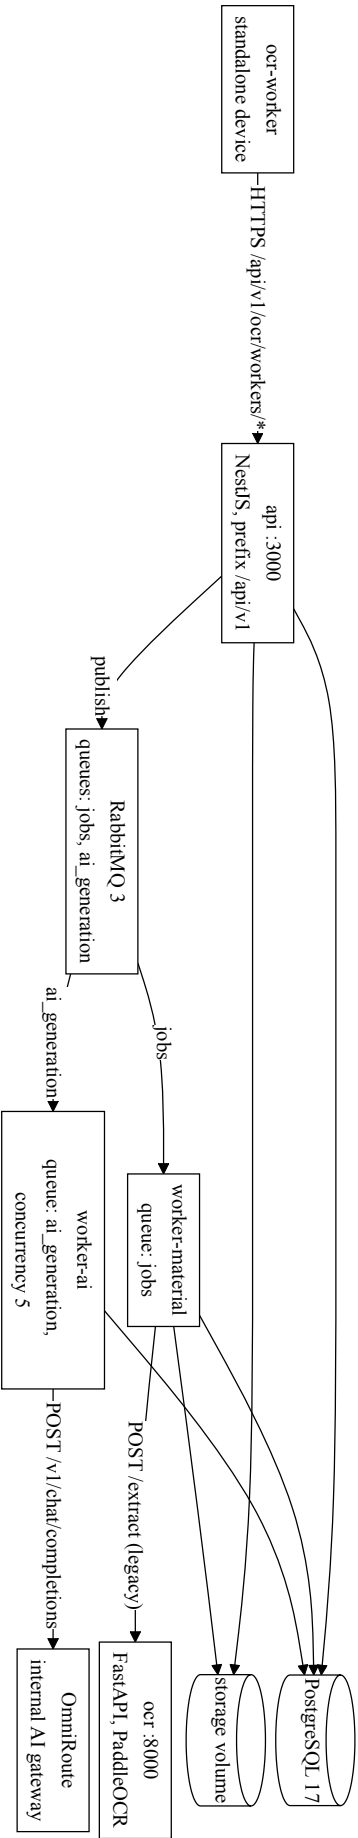

Figure 2.1. System architecture and deployment topology: (left) the single public ingress through the Cloudflare Tunnel and the internal nginx routing; (right) the internal services on the private Docker network and their data flows.

CatLium EduTech — Level-0 Data Flow Diagram

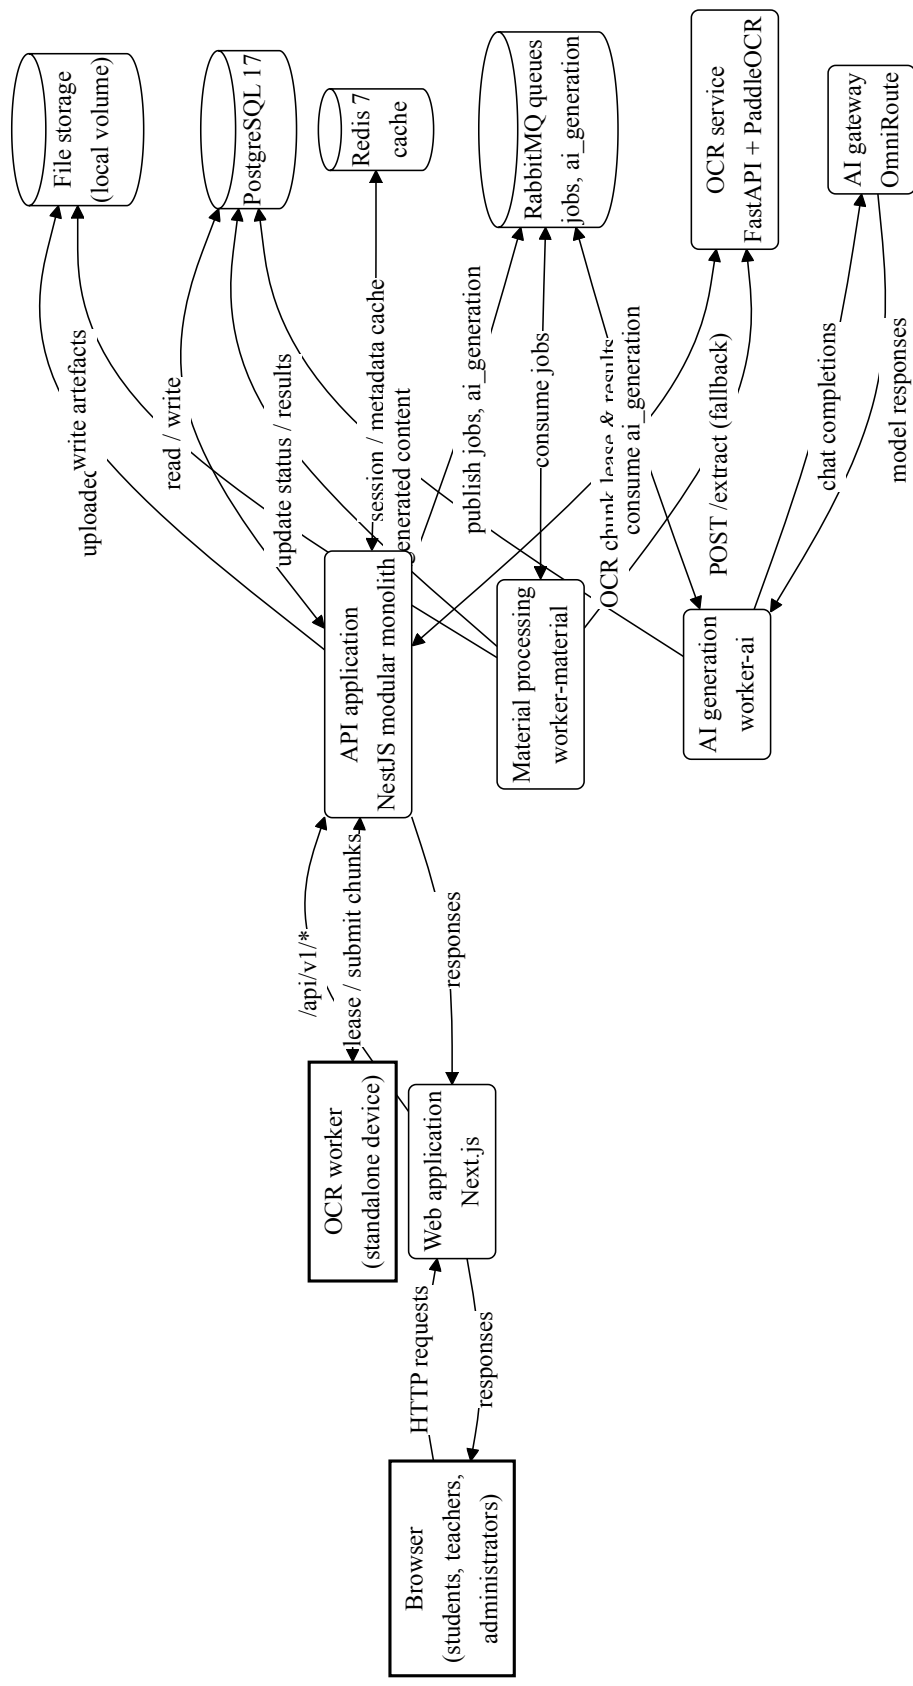

Figure 2.2. Level-0 data flow diagram of the system.

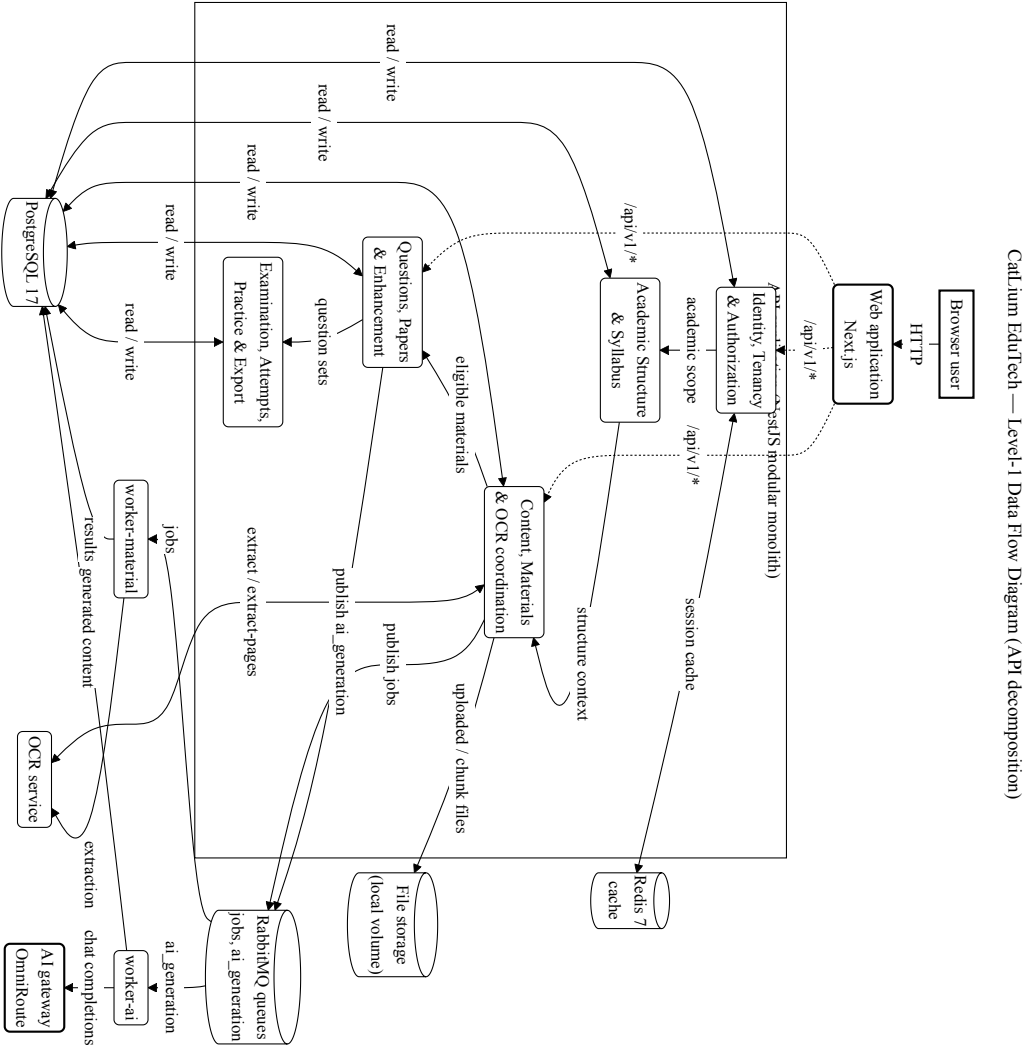

Figure 2.3. Level-1 data flow diagram: decomposition of the API application into its principal functional areas.

CatLium EduTech — Level-2 DFD (a): API-side coordination of OCR

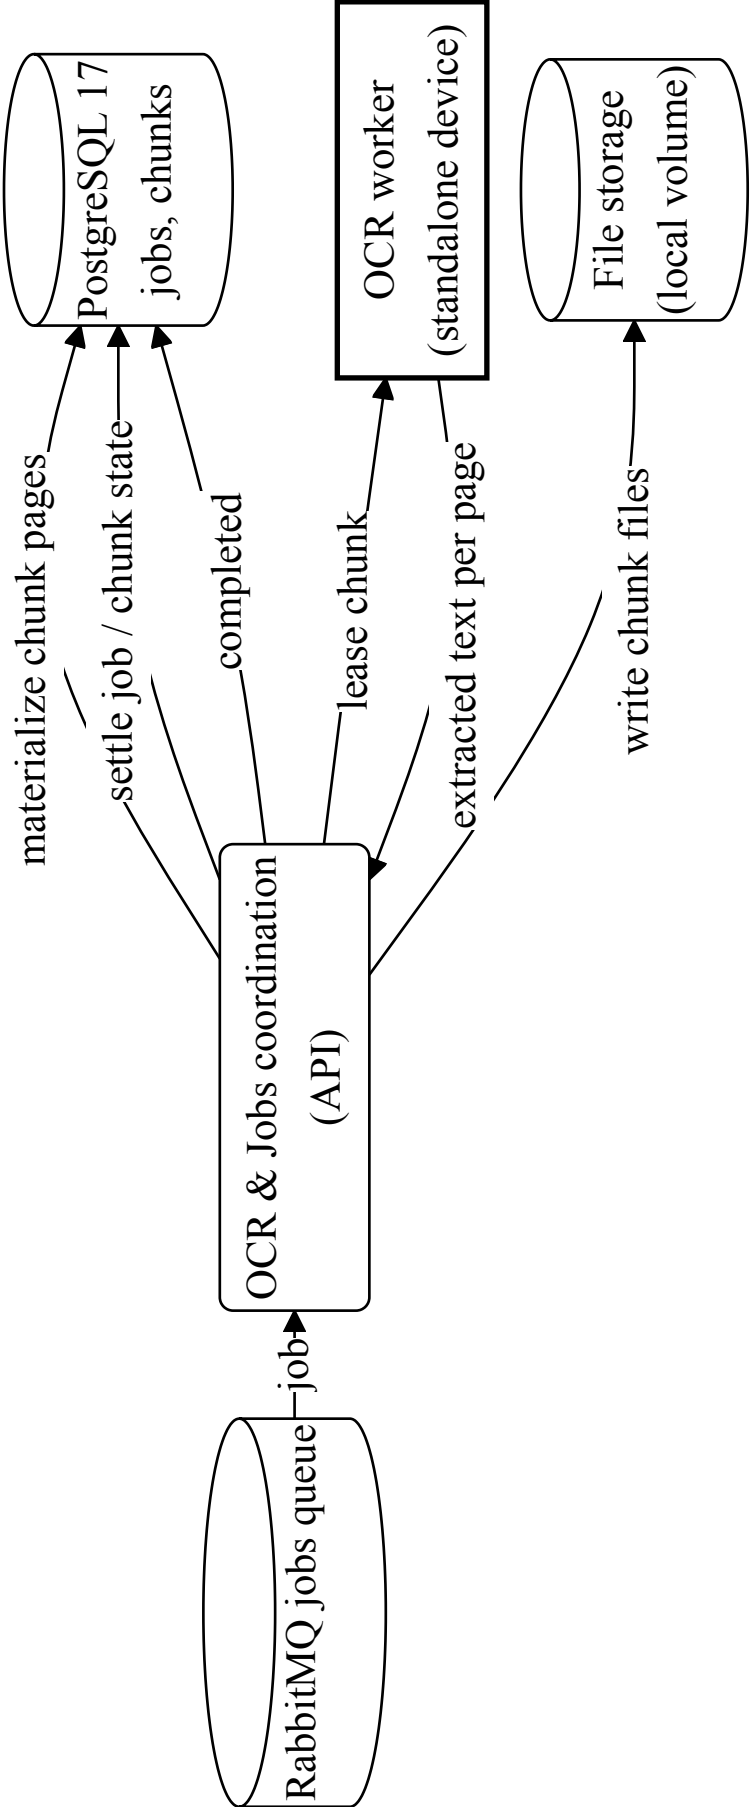

Figure 2.4. Level-2 data flow diagram — OCR and material-processing pipeline, part 1: API-side coordination of chunk leasing, aggregation, and job settlement.

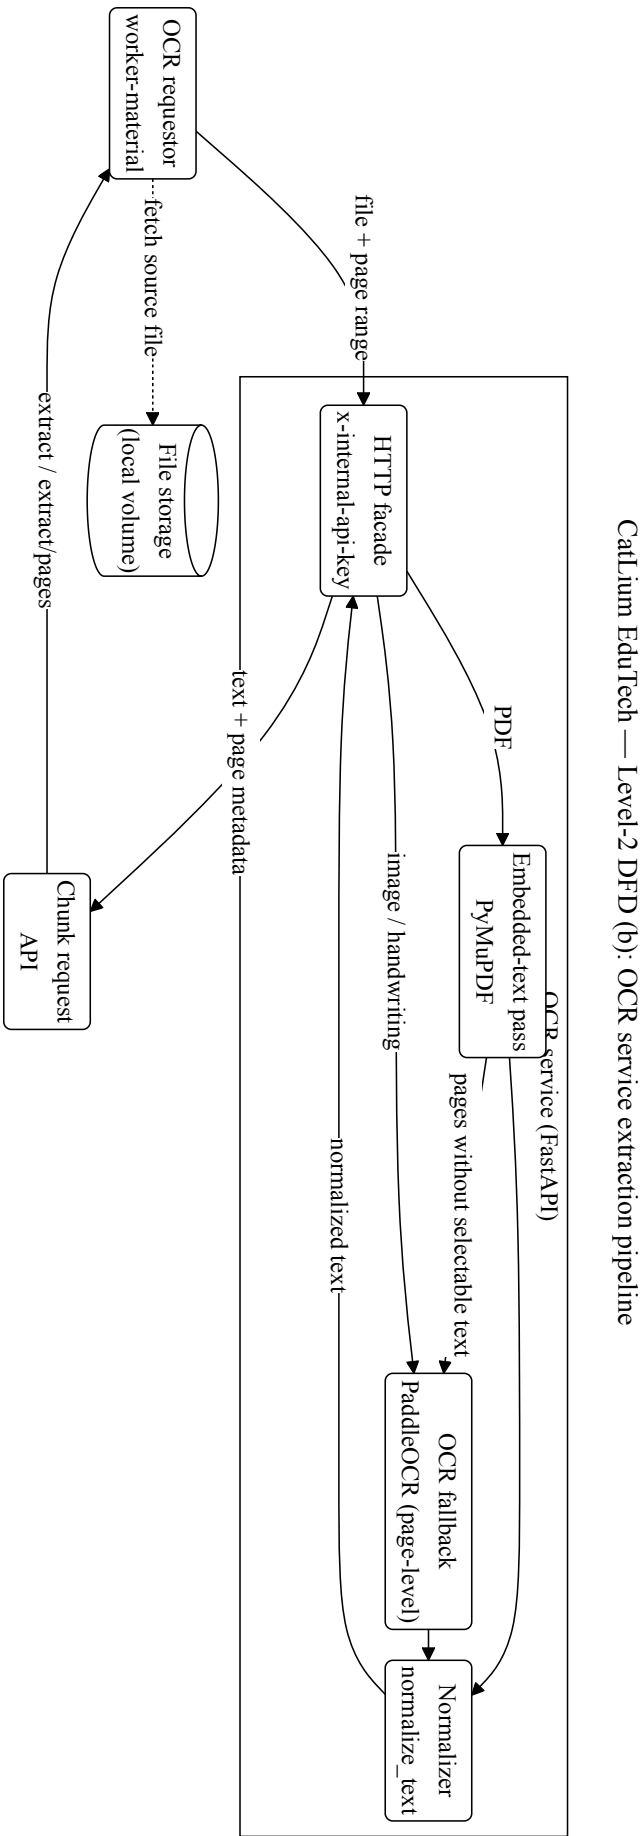

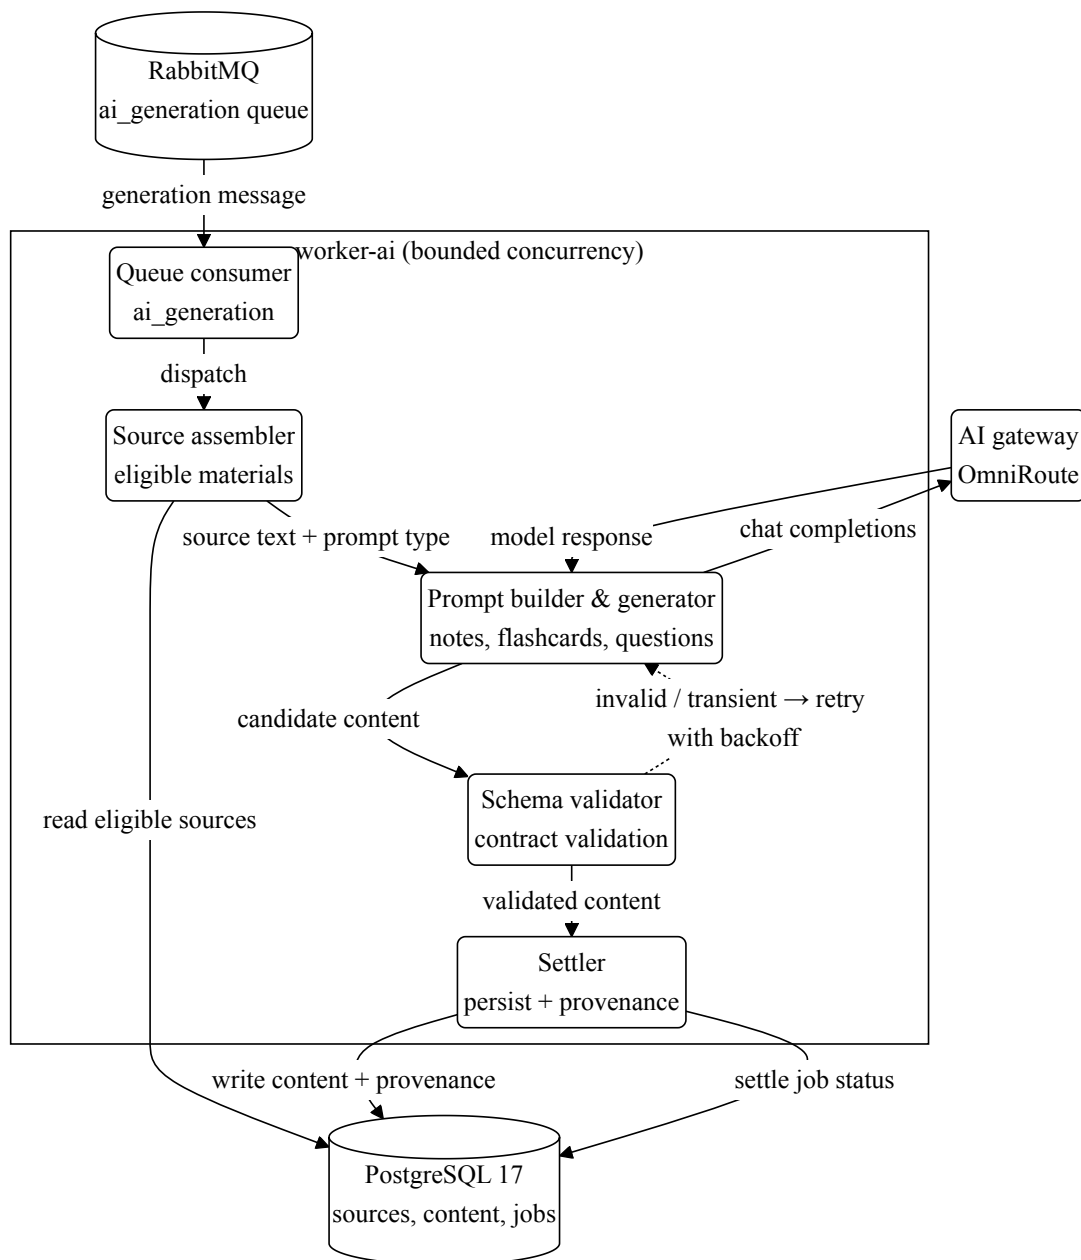

Figure 2.5. Level-2 data flow diagram — OCR and material-processing pipeline, part 2: the OCR service extraction pipeline (embedded text, PaddleOCR fallback, normalization).

CatLium EduTech — Level-3 Data Flow Diagram (AI generation pipeline)

Figure 2.6. Level-3 data flow diagram: the AI generation pipeline inside `worker-ai`.

Chapter 3

Database Design

Catlium EduTech — Database Schema (1a): Identity and Session-bound Authentication

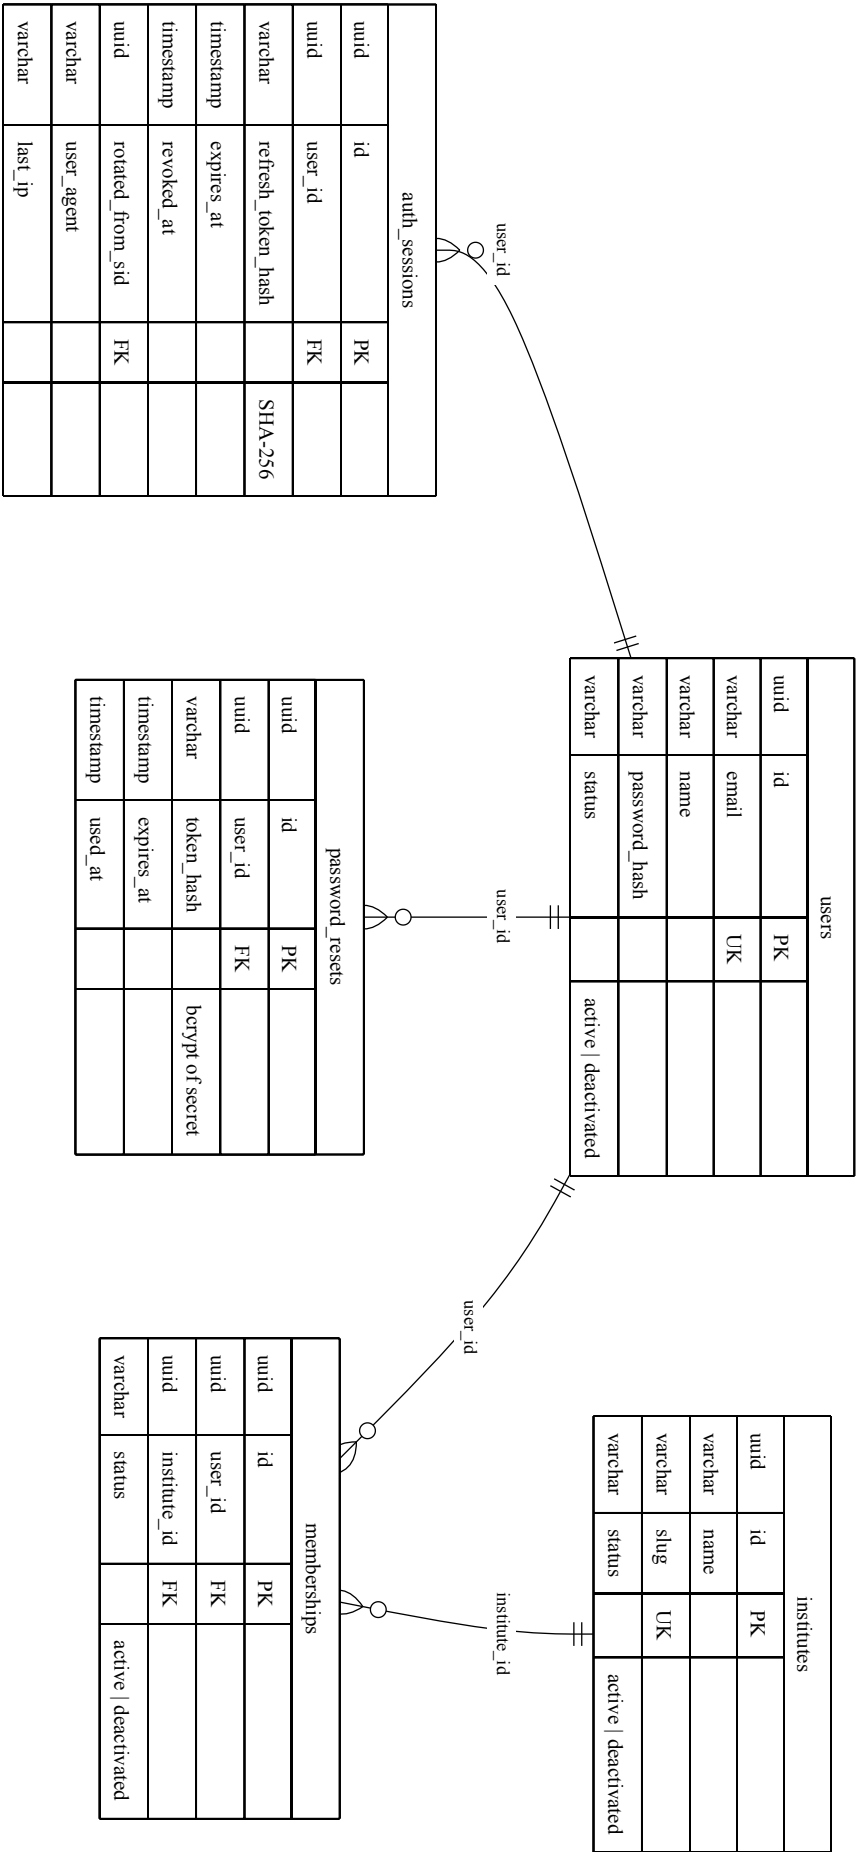

Figure 3.1. Database schema — the identity and authentication core: users, institute memberships, sessions, and password resets.

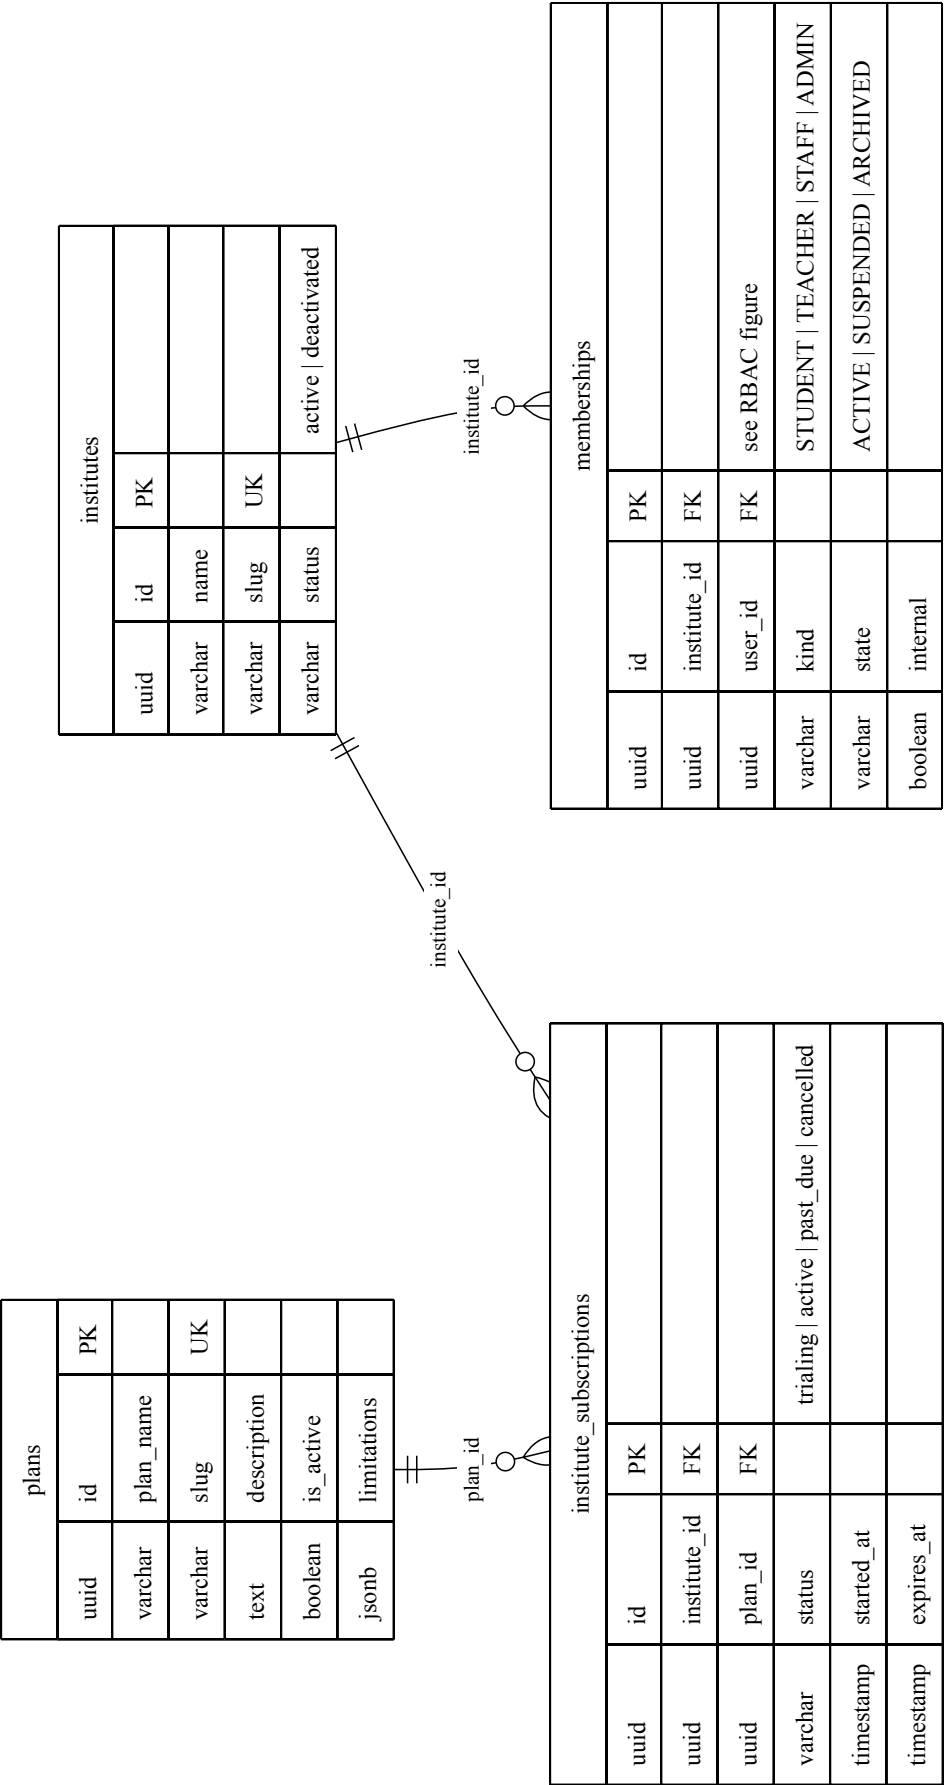

Figure 3.2. Database schema — the tenancy core: institutes, memberships, and subscription plans.

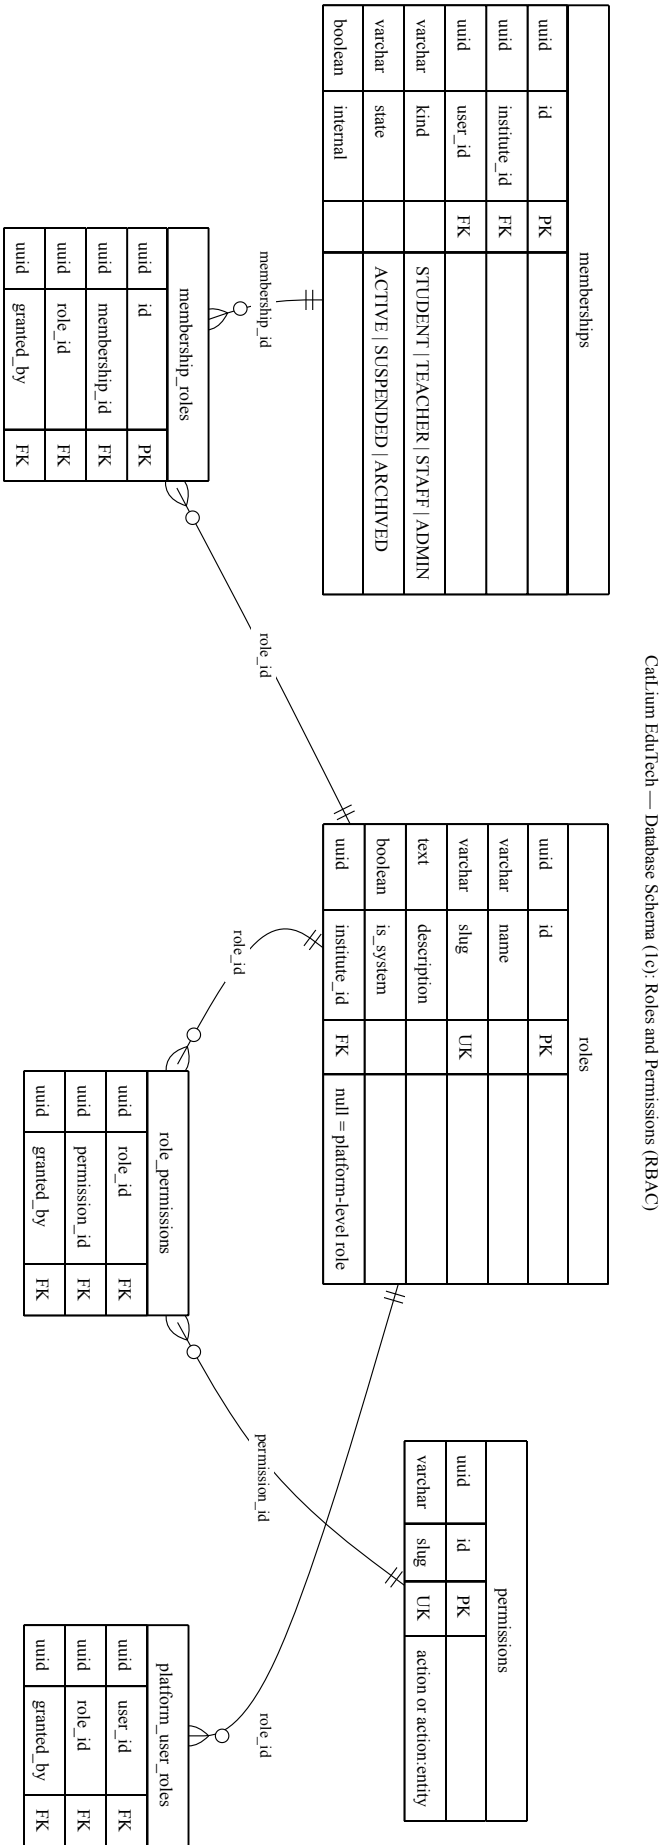

Figure 3.3. Database schema — the roles/permissions (RBAC) core.

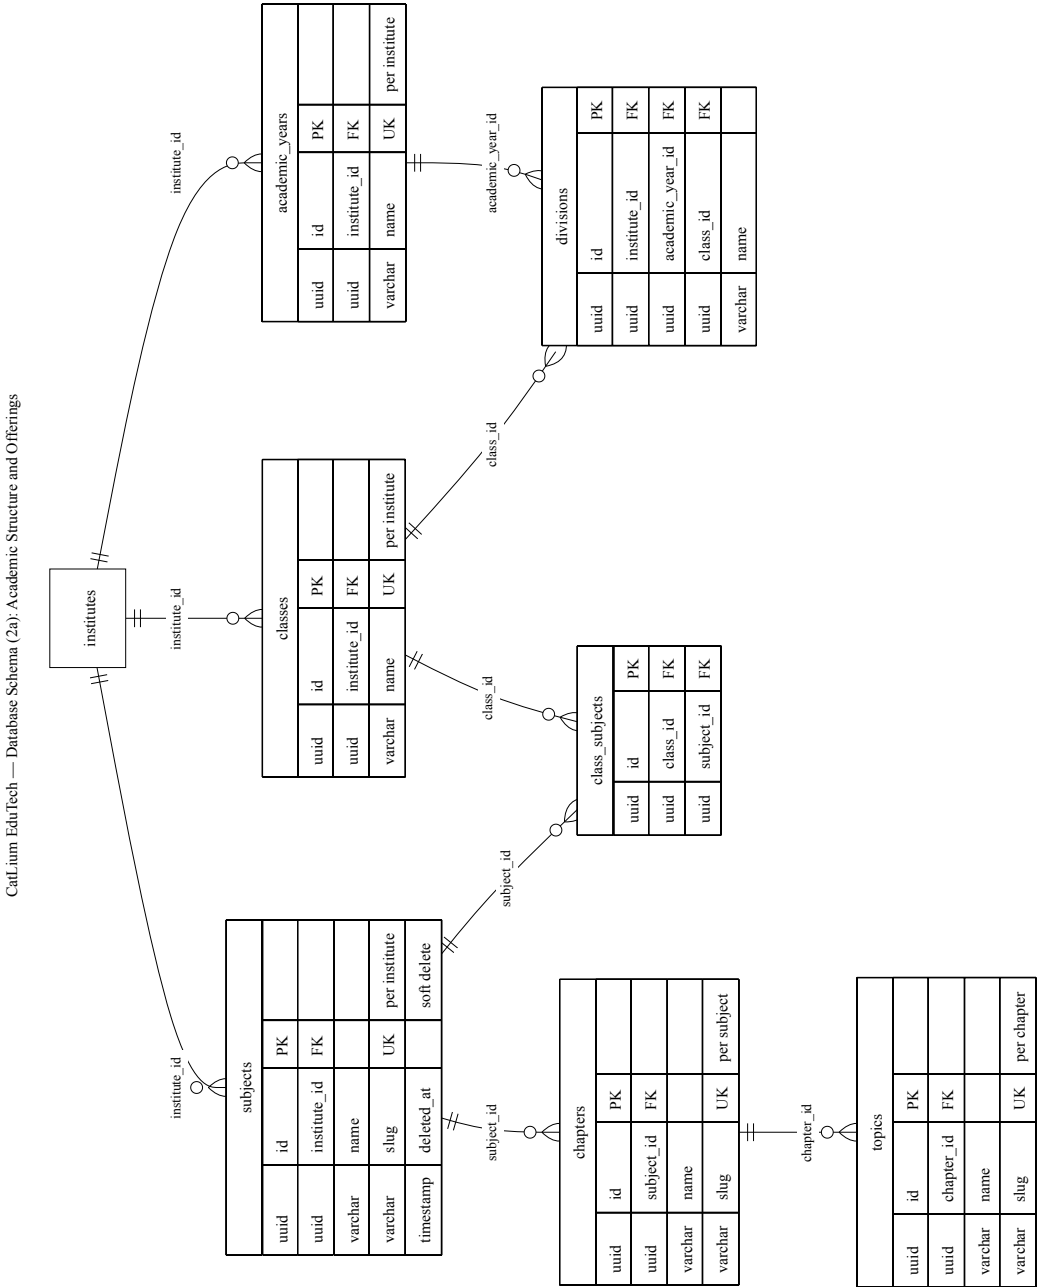

Figure 3.4. Database schema — academic structure: the subject chain (`subjects` → `chapters` → `topics`), class offerings, and academic years.

CatLium EduTech — Database Schema (2c): Materials and Enhancements

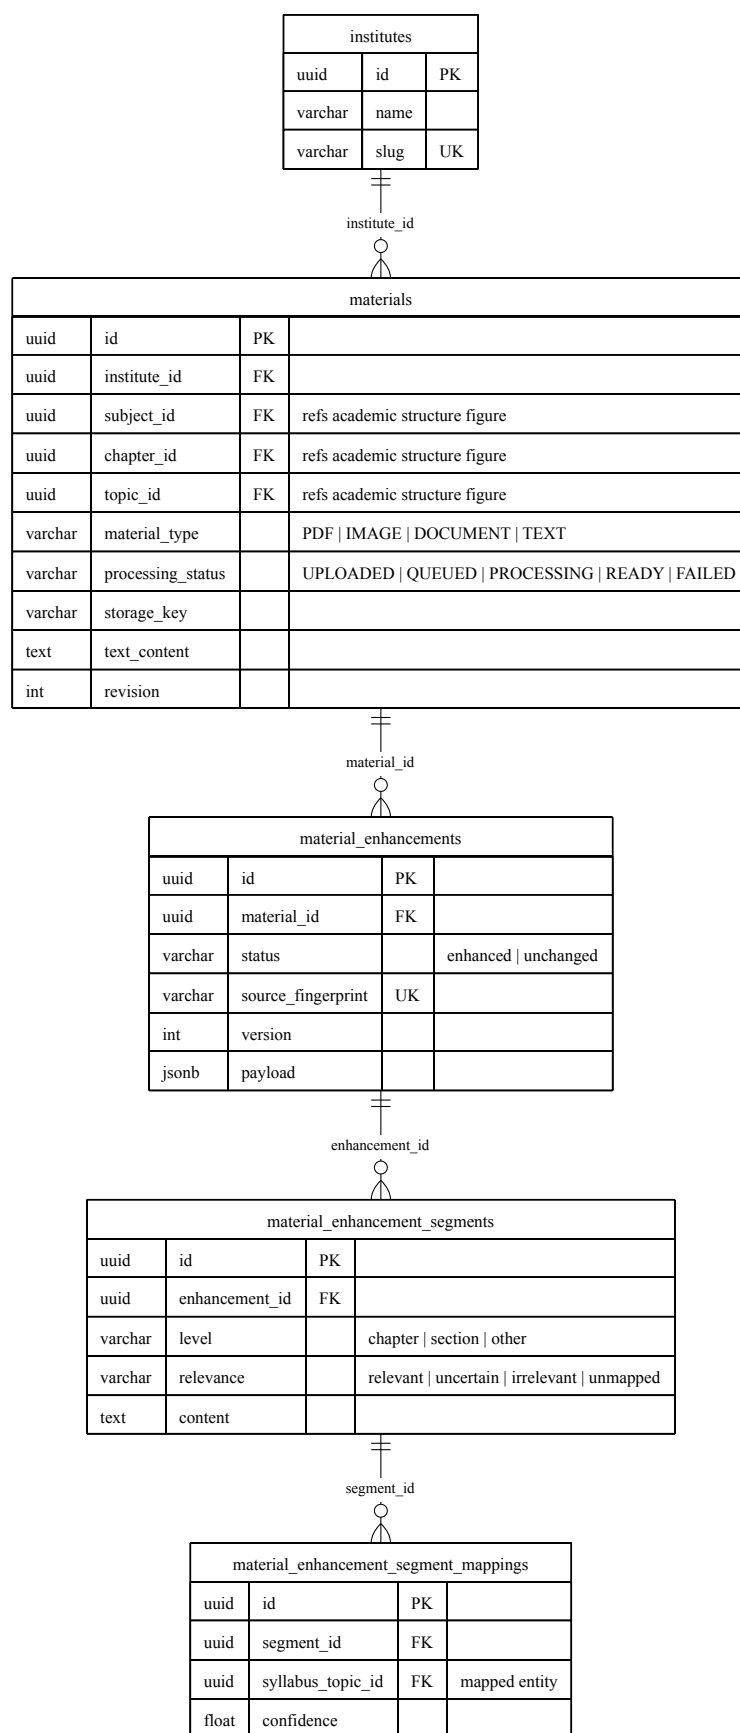

Figure 3.6. Database schema — materials with their deterministic enhancement chain.

CatLium EduTech — Database Schema (2d): Content Items and Versions

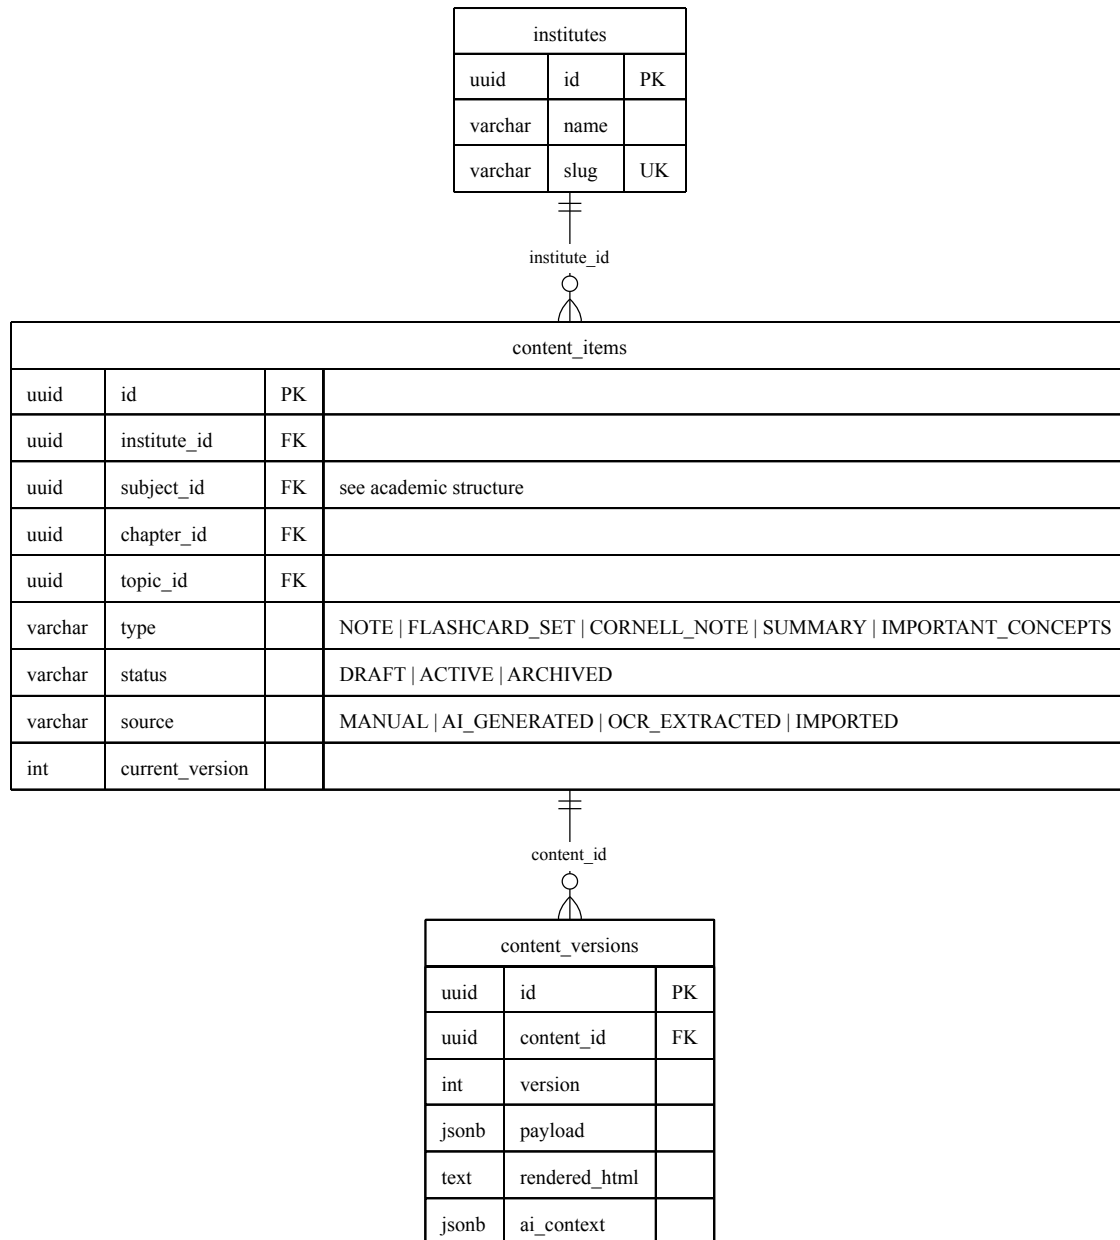

Figure 3.7. Database schema — versioned content items.

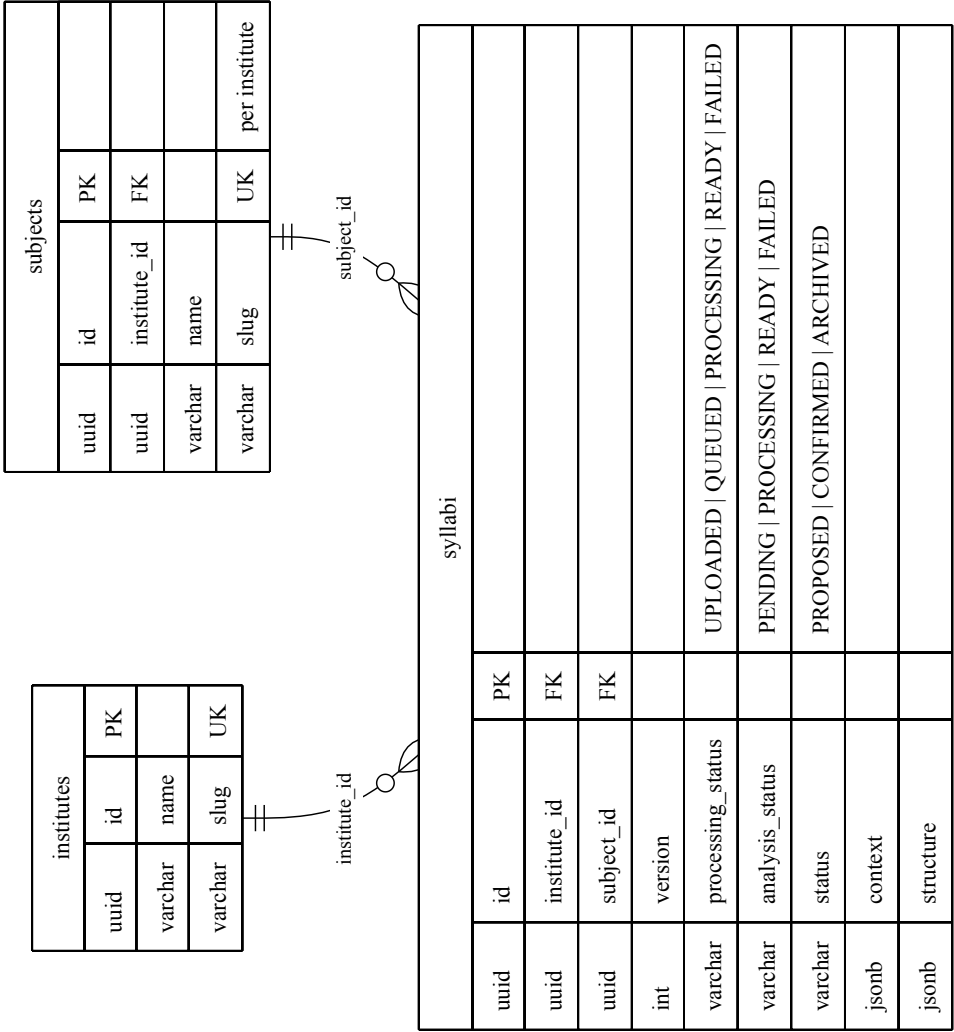

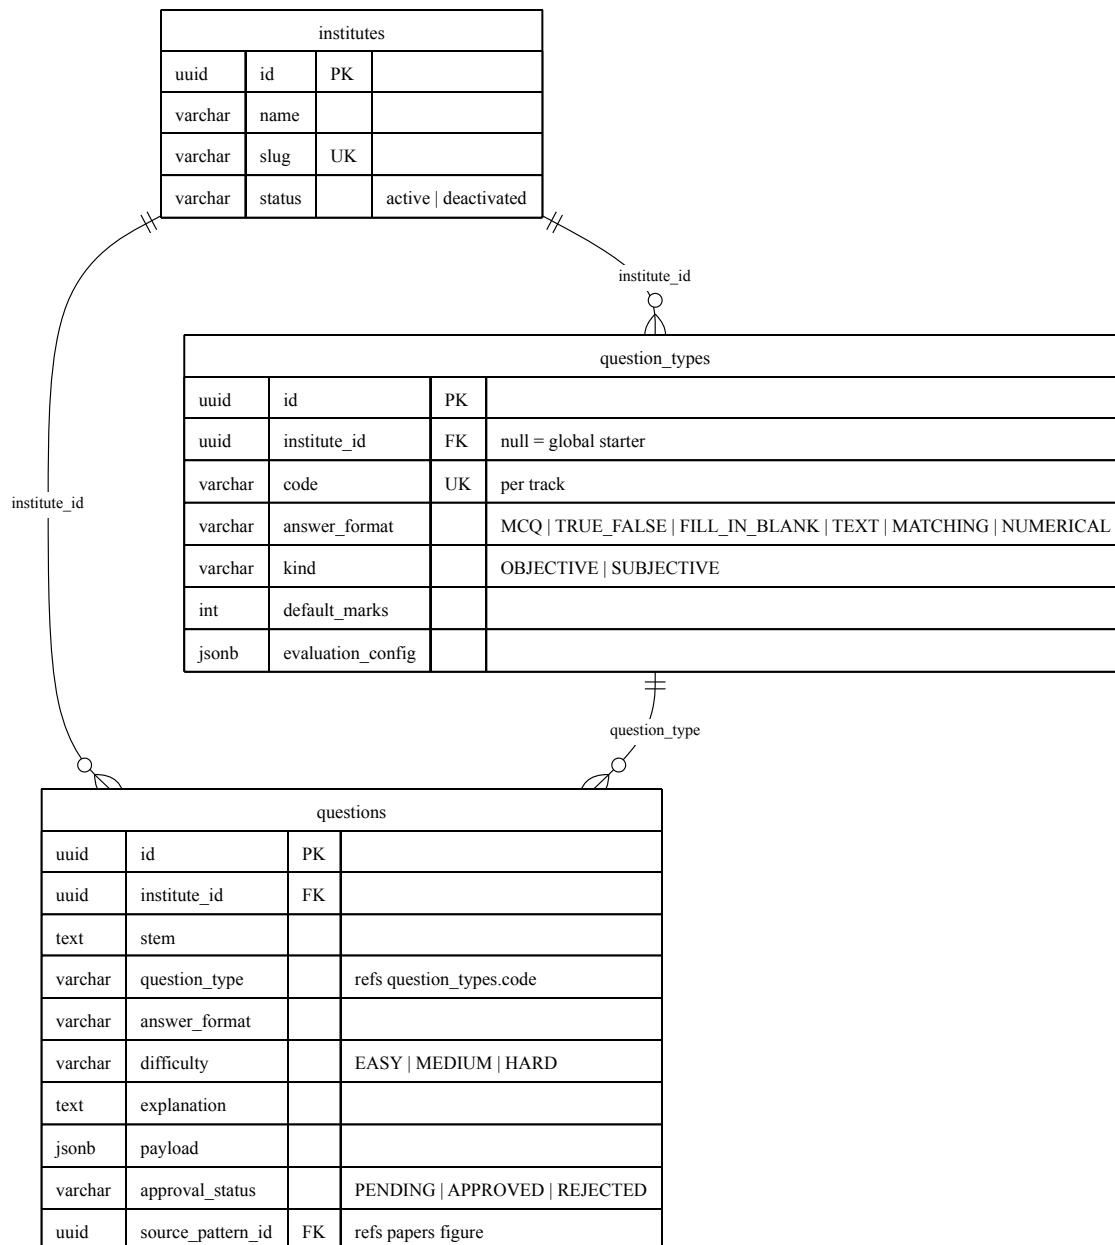

Figure 3.8. Database schema — per-subject syllabi and their lifecycle.

CatLium EduTech — Database Schema (3a): Question Bank

Figure 3.9. Database schema — question bank: question types and the scoped **questions** table.

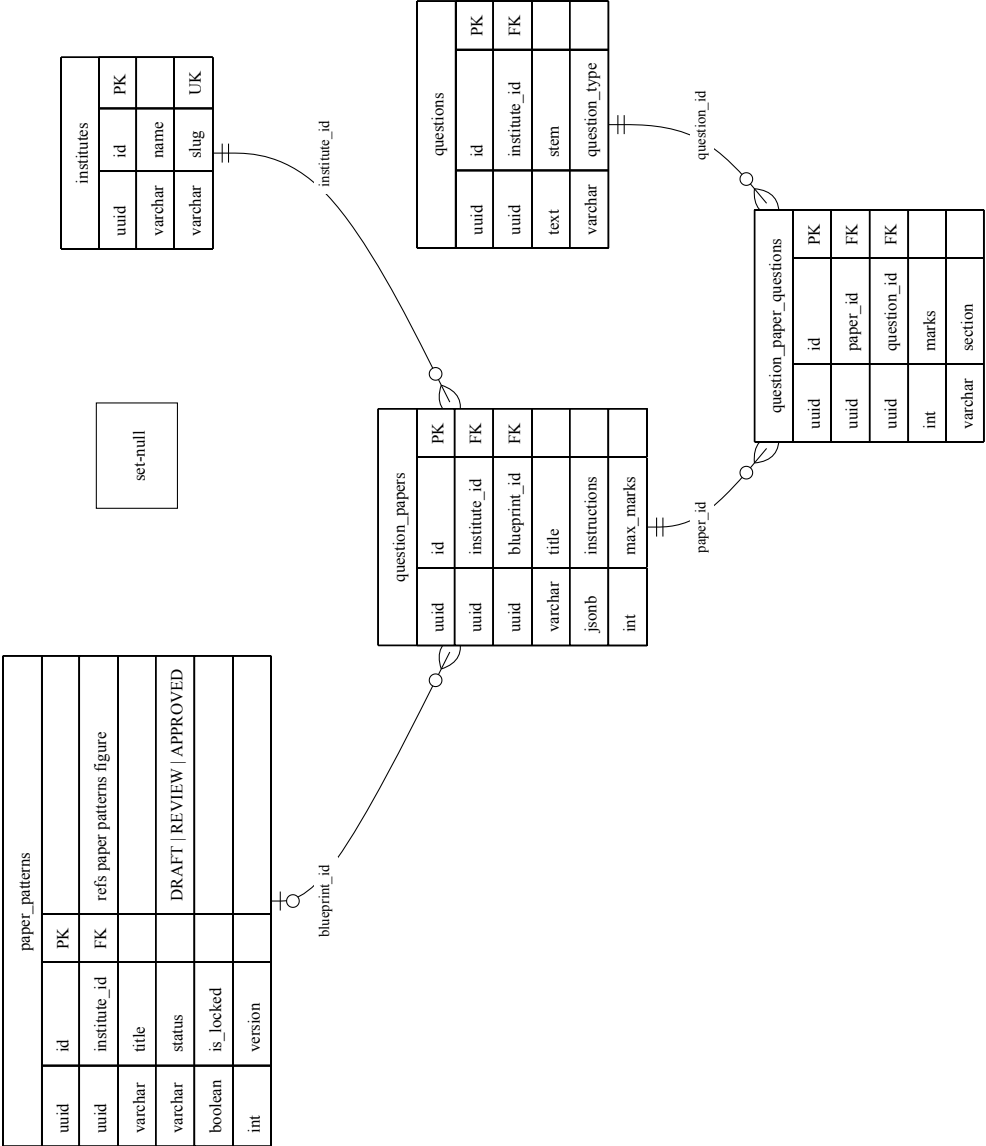

Figure 3.10. Database schema — question papers: the blueprint-driven question_papers snapshot.

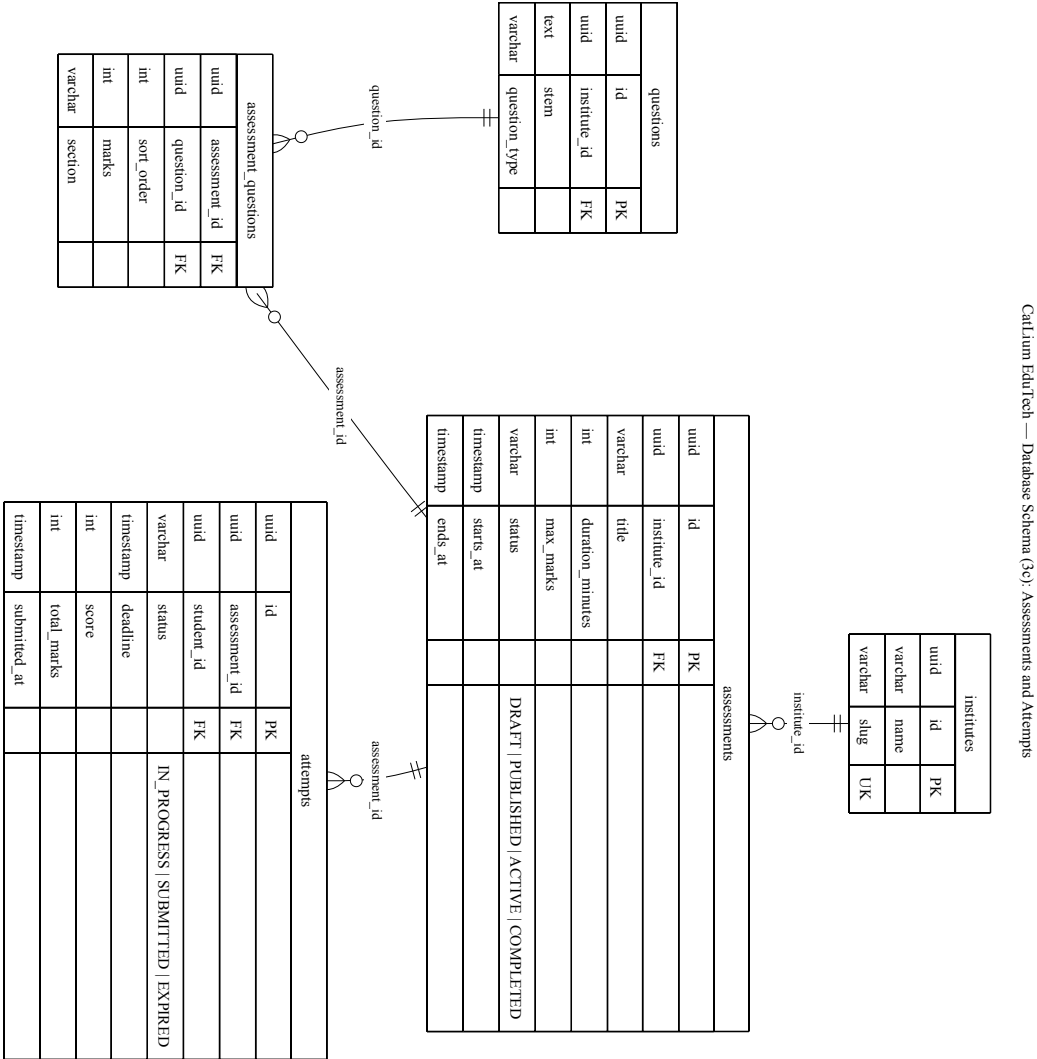

Figure 3.11. Database schema — examination: assessments and their subject binding.

CatLium EduTech — Database Schema (3d): Attempt Responses

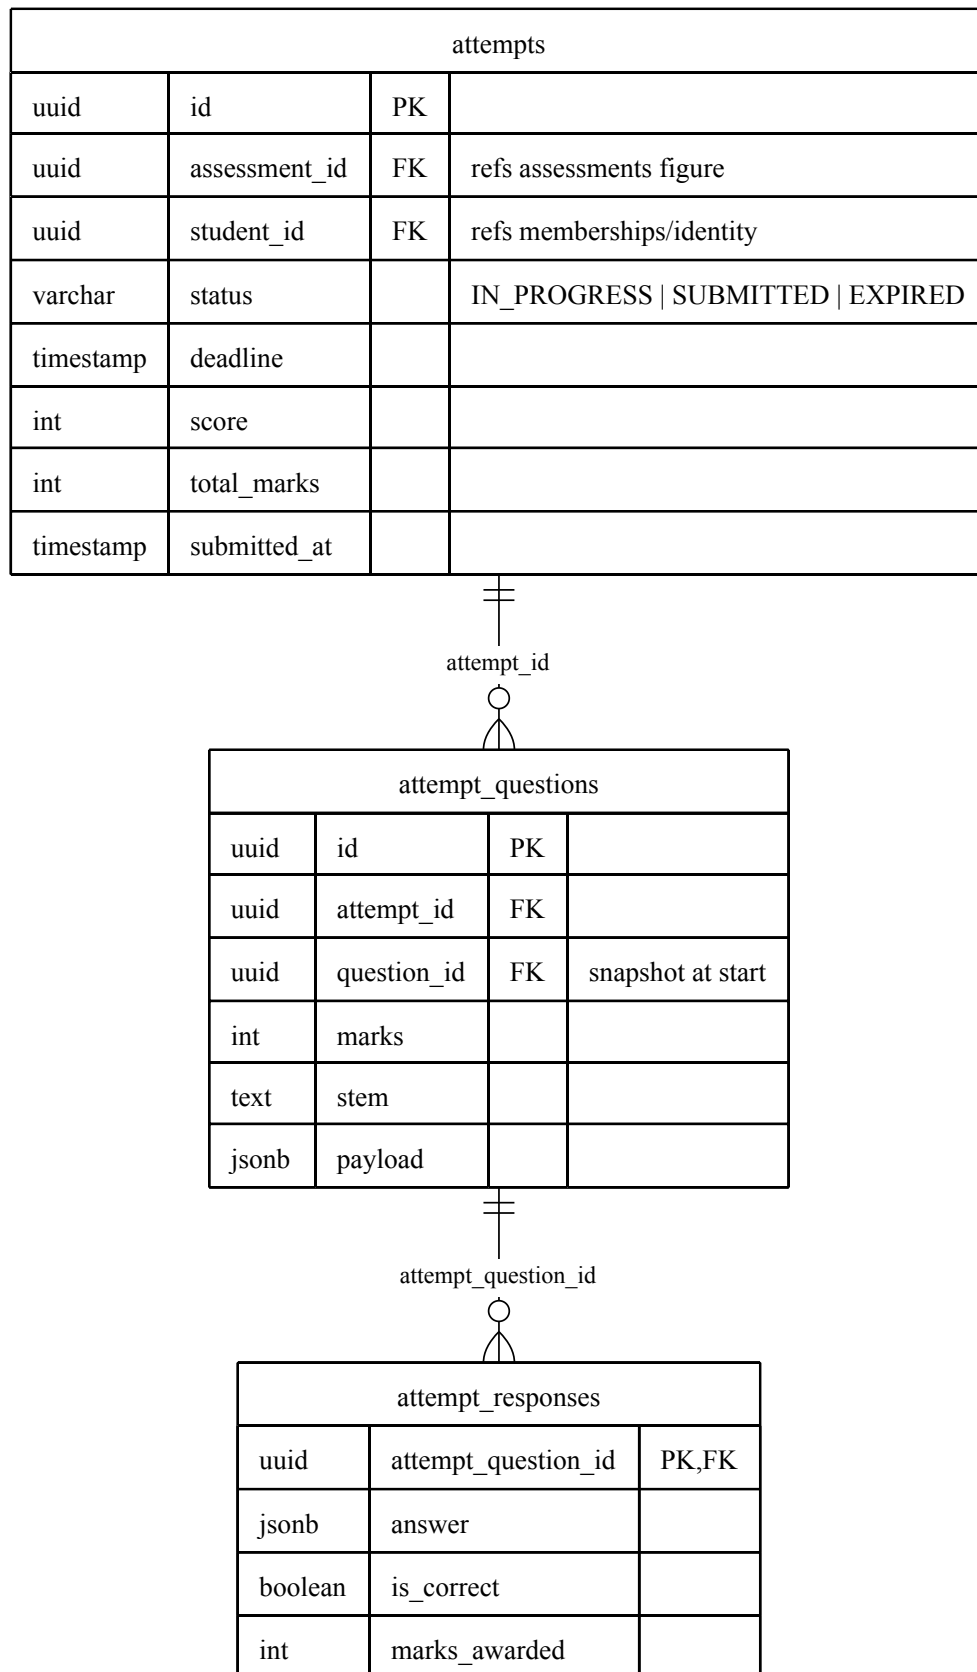

Figure 3.12. Database schema — attempt snapshots and response tables.

CatLium EduTech — Database Schema (3e): Practice Sessions

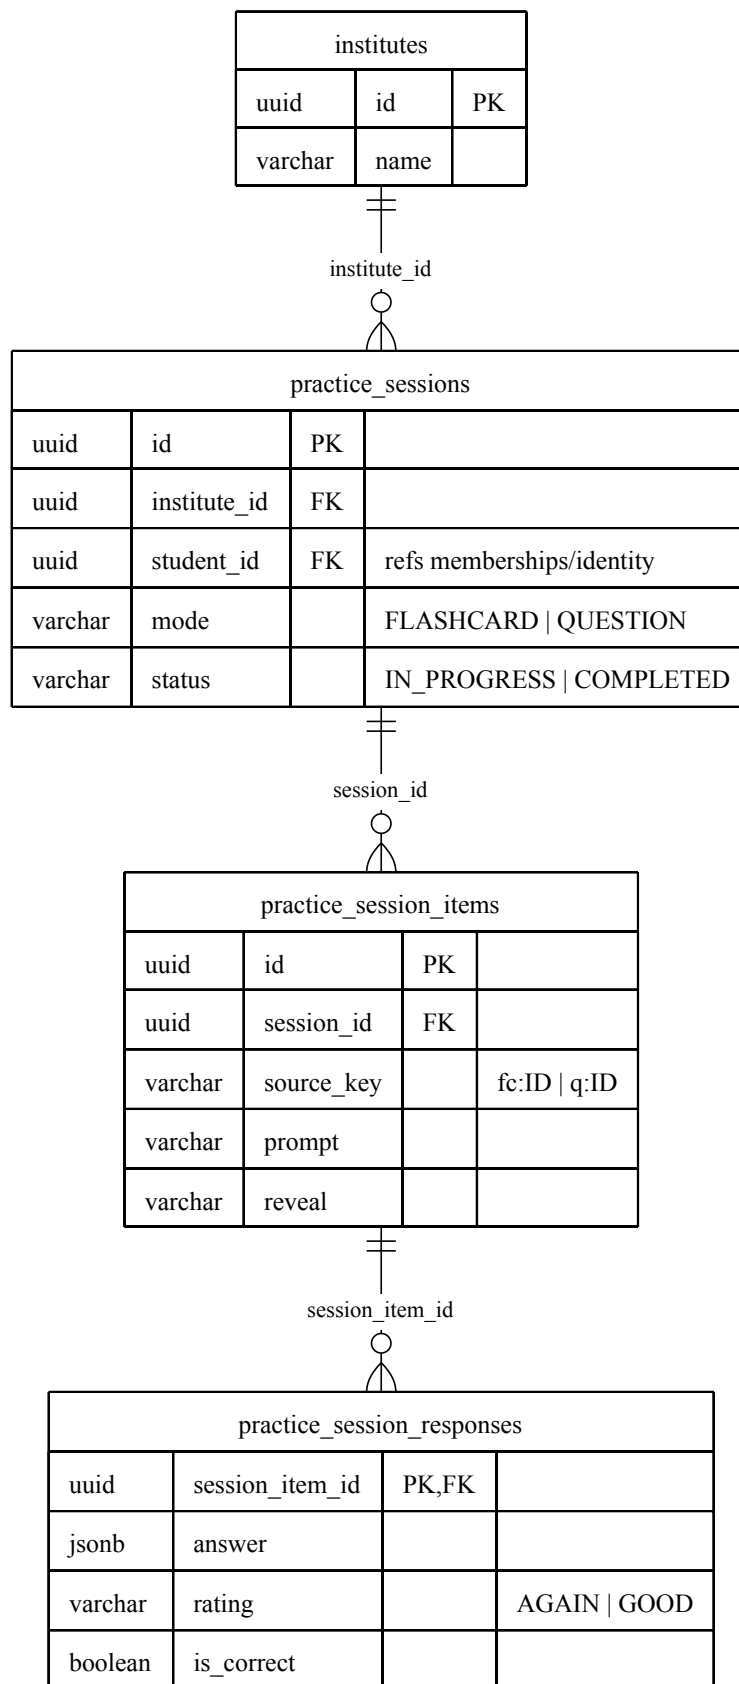

Figure 3.13. Database schema — ungraded practice sessions.

CatLium EduTech — Database Schema (3e): Jobs, Workers, and OCR Chunks

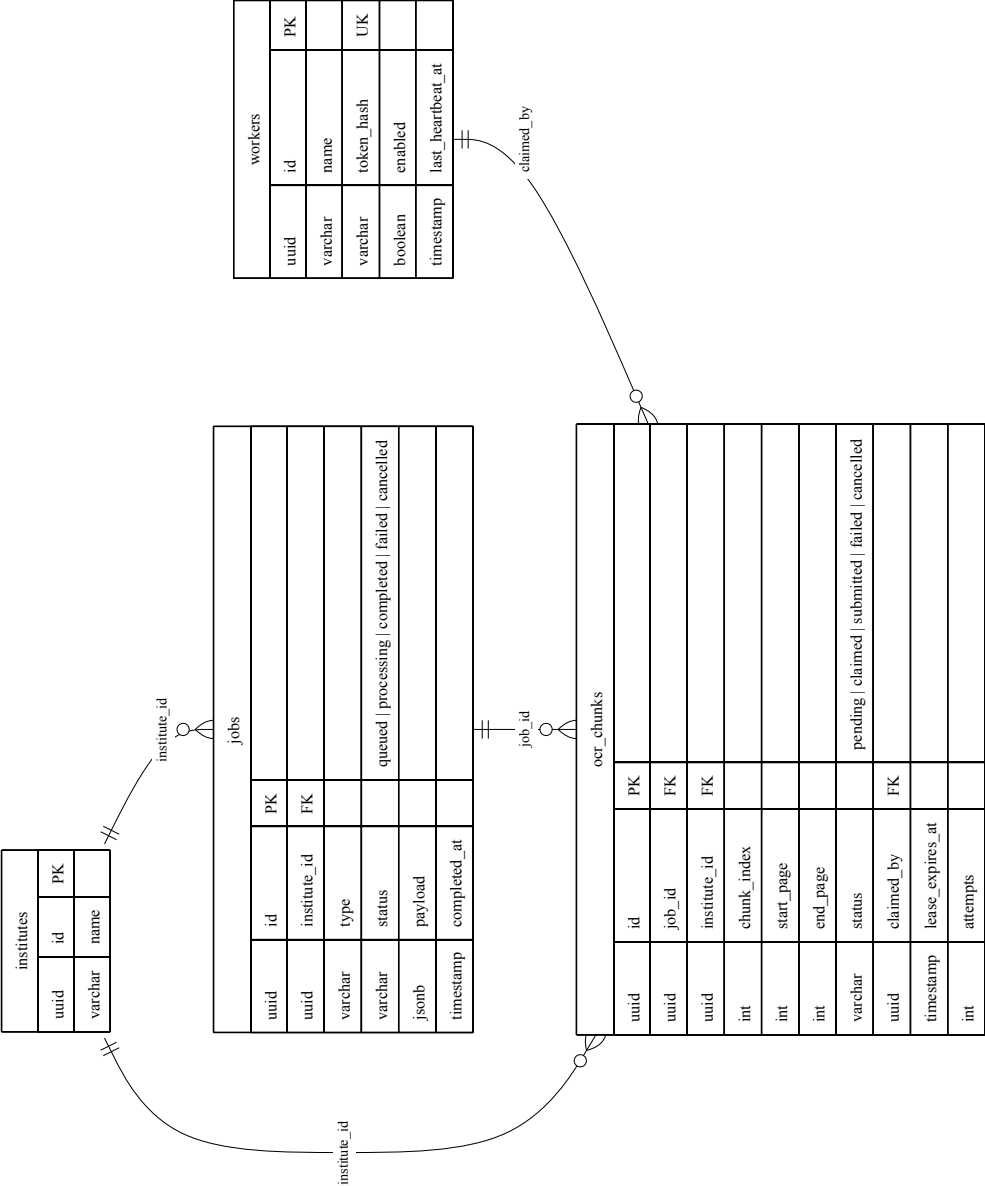

Figure 3.14. Database schema — operations: the job/worker/OCR-chunk registry.

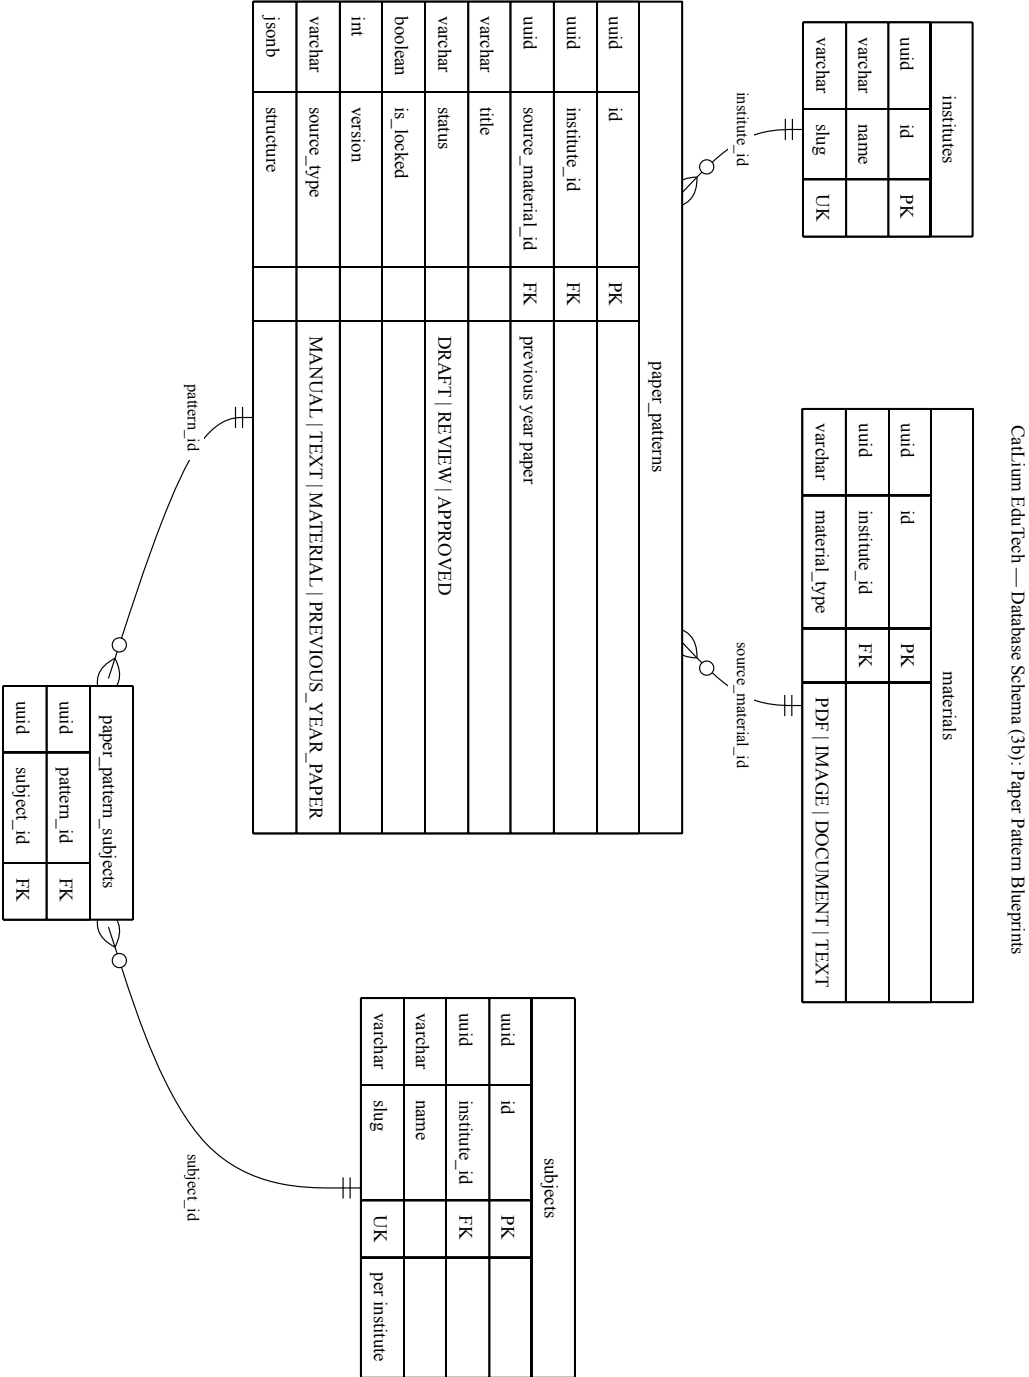

Figure 3.15. Database schema — operations: paper-pattern blueprints.

Chapter 4

Security and Authorization Architecture

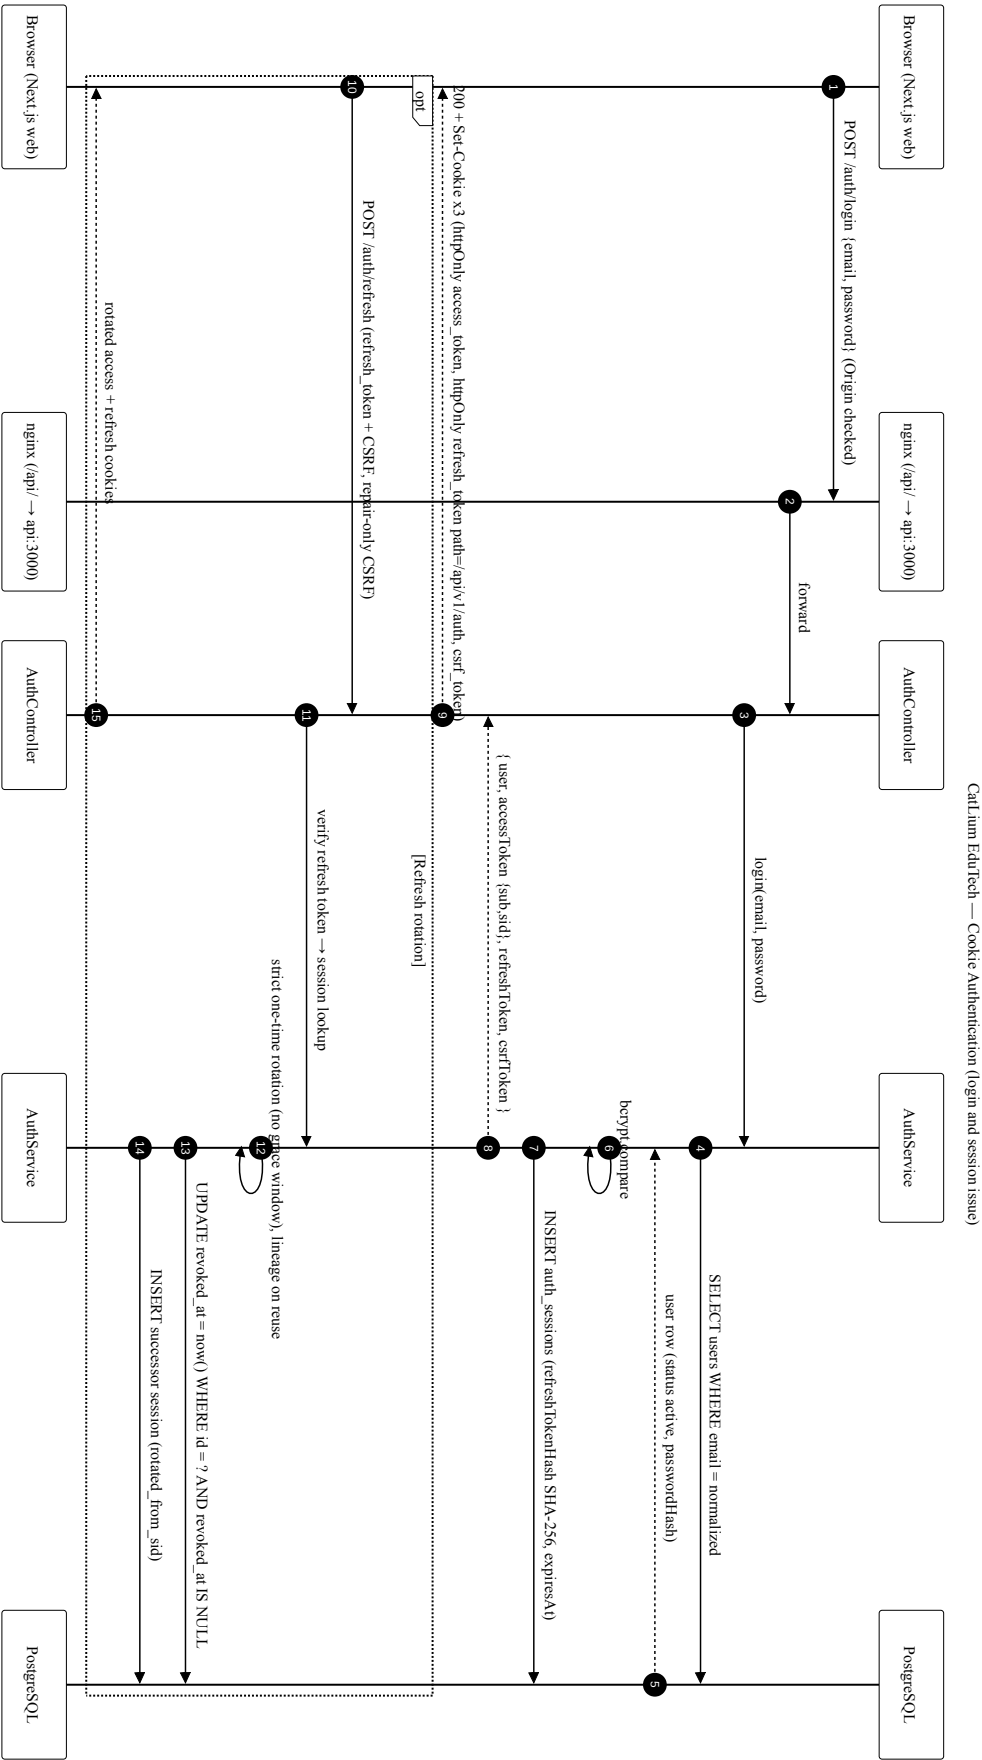

Figure 4.1. Cookie authentication: login, cookie issue, and strict one-time refresh rotation.

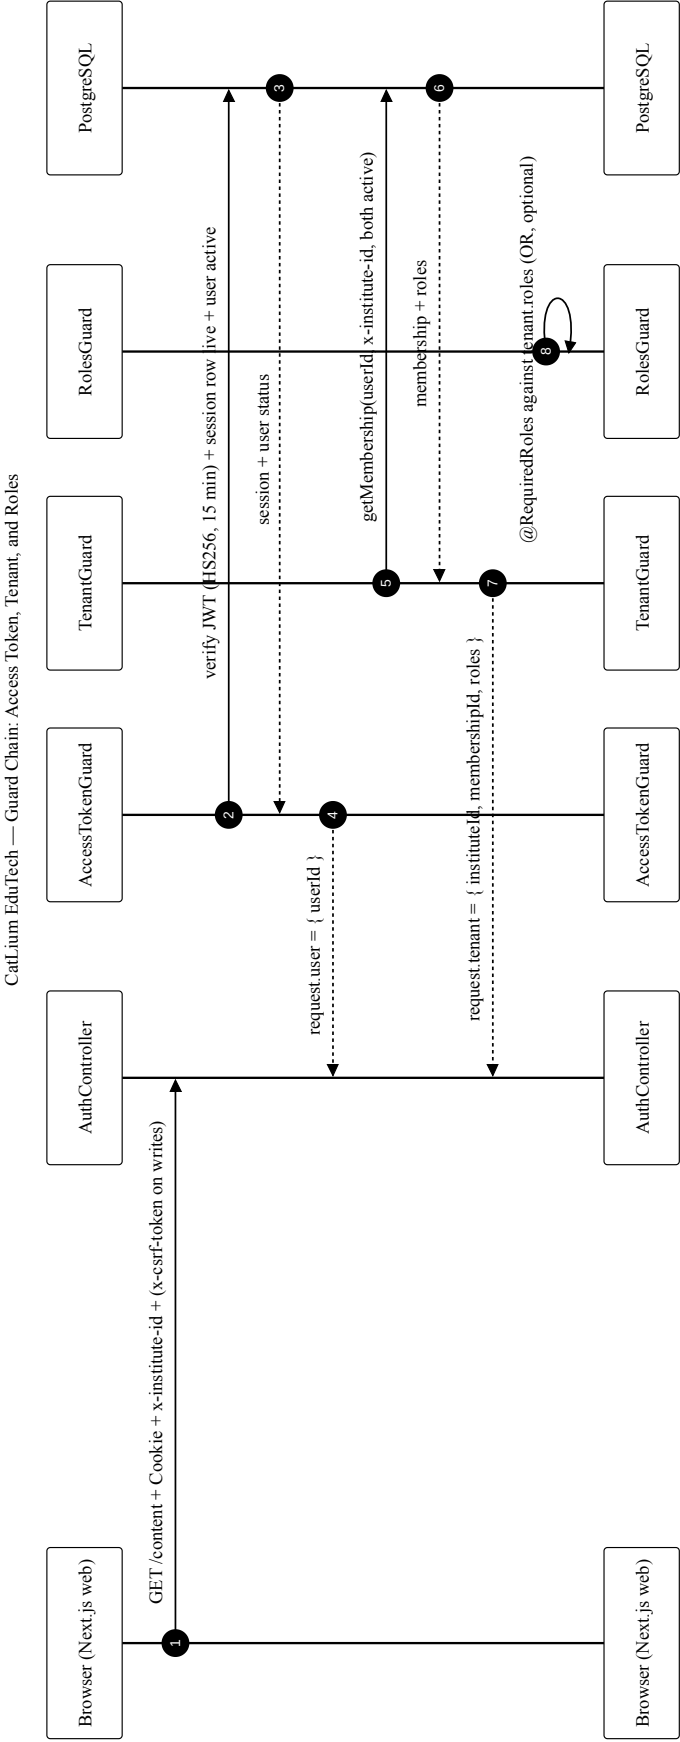

Figure 4.2. Tenant-scoped request flow, part 1: the access-token, tenant, and roles guards.

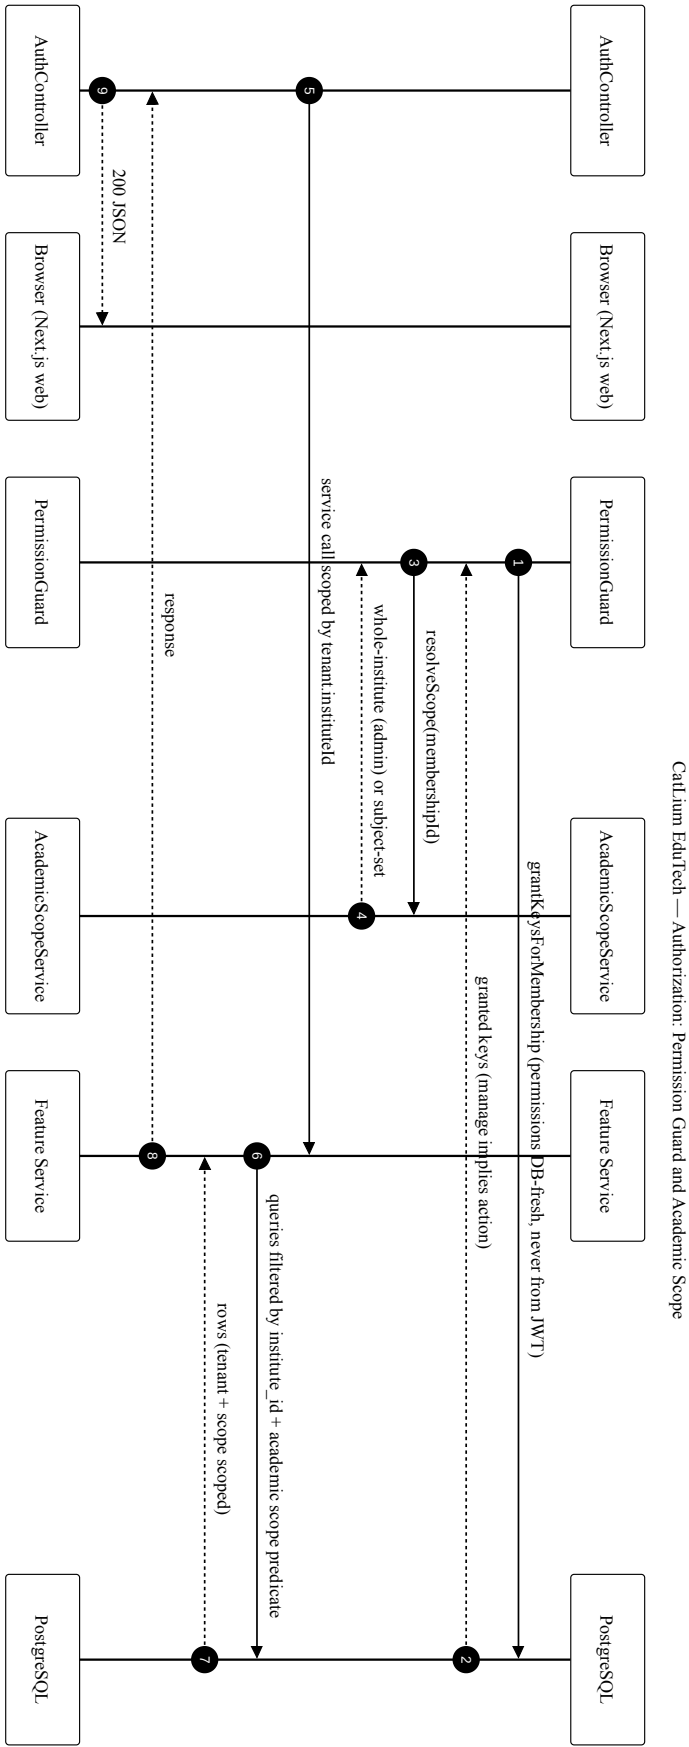

Figure 4.3. Tenant-scoped request flow, part 2: permission-guard evaluation and academic-scope enforcement in the feature service.

CatLium EduTech — Authorization Decision Chain (guards)

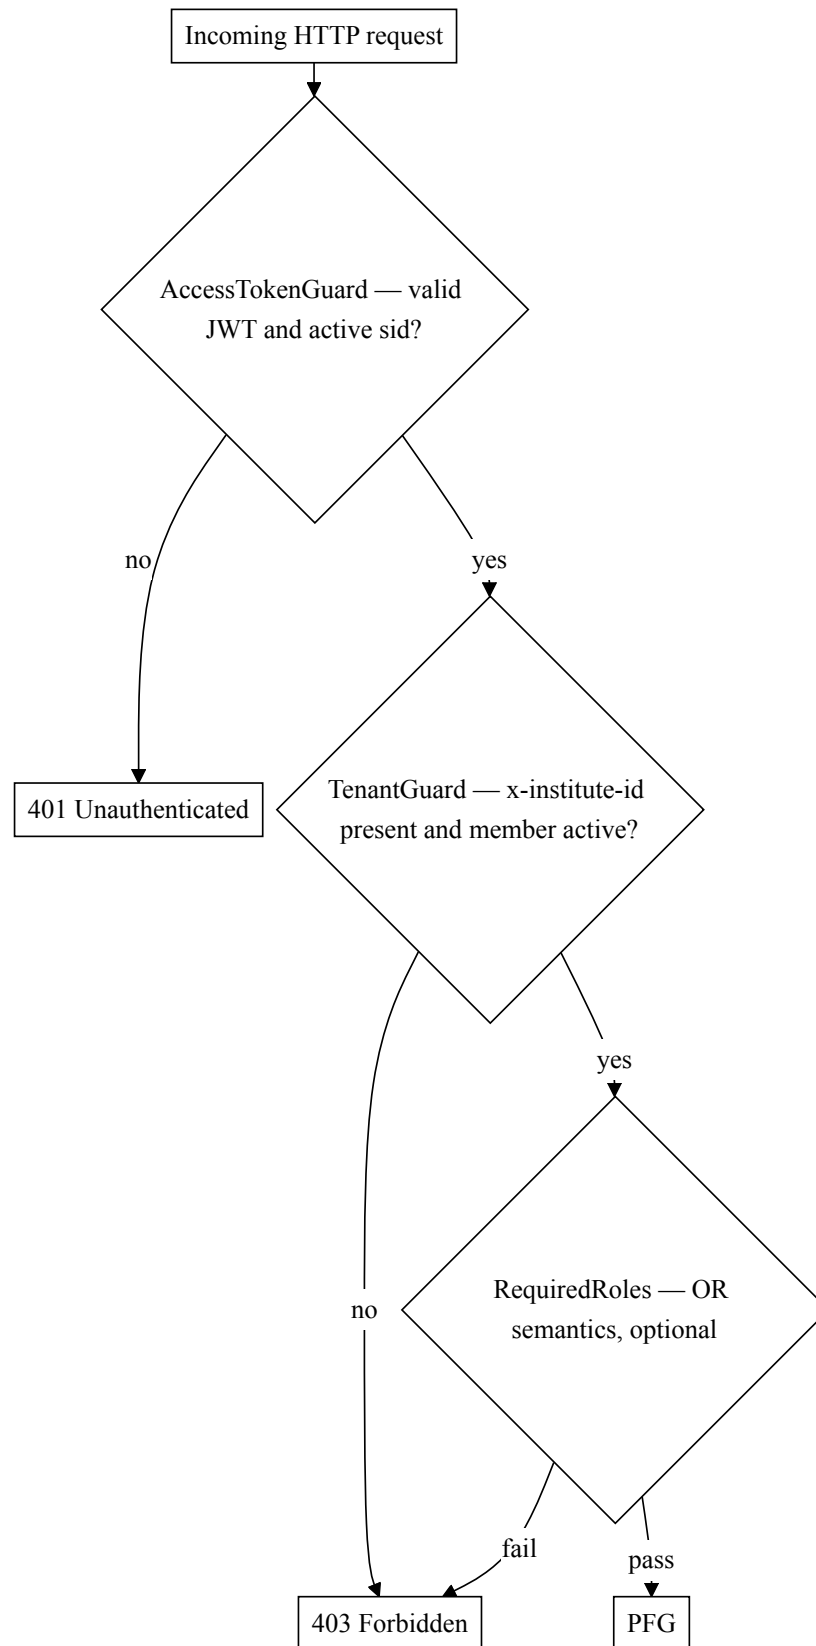

Figure 4.4. Authorization decision chain for a tenant-scoped request, part 1: the guard-stage decisions.

CatLium EduTech — Authorization Decision Chain (permission + scope)

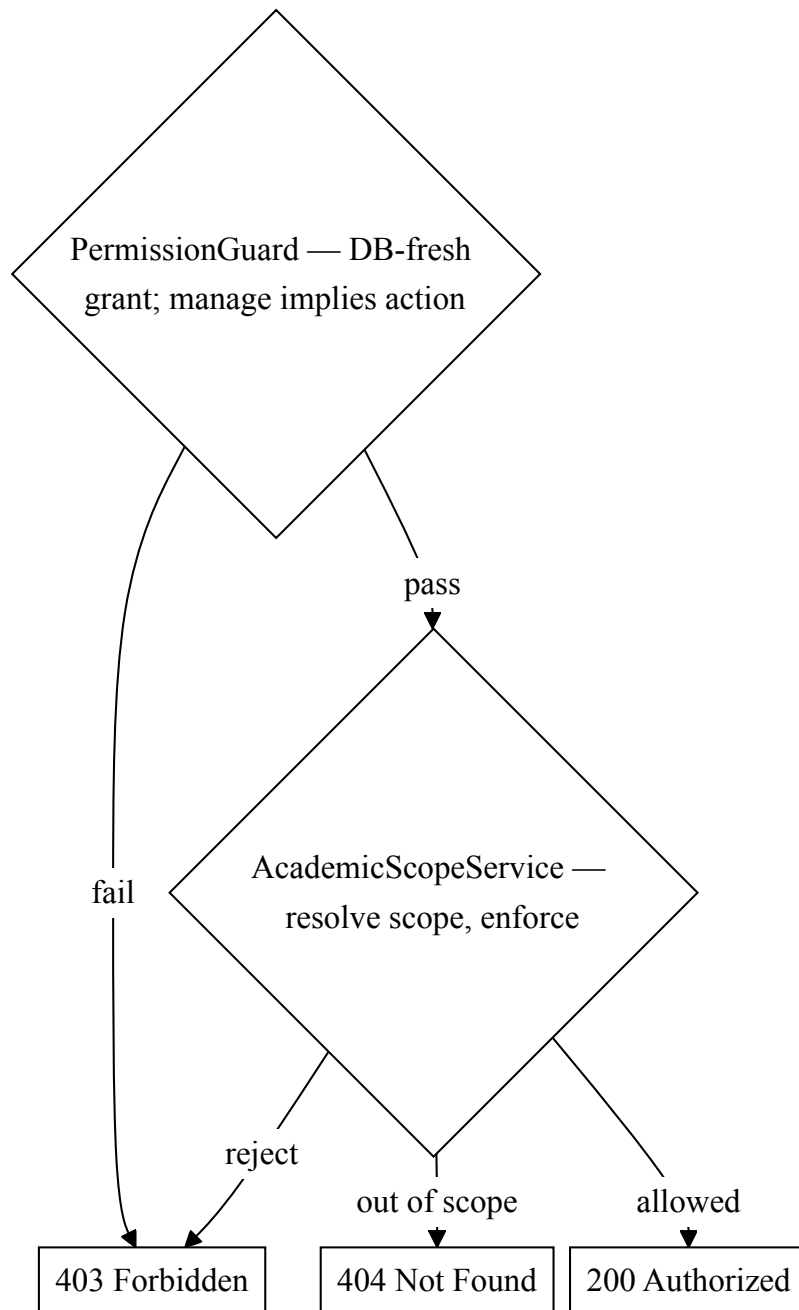

Figure 4.5. Authorization decision chain for a tenant-scoped request, part 2: permission evaluation and academic-scope enforcement outcomes.

CatLium EduTech — Academic Scope Resolution and Enforcement

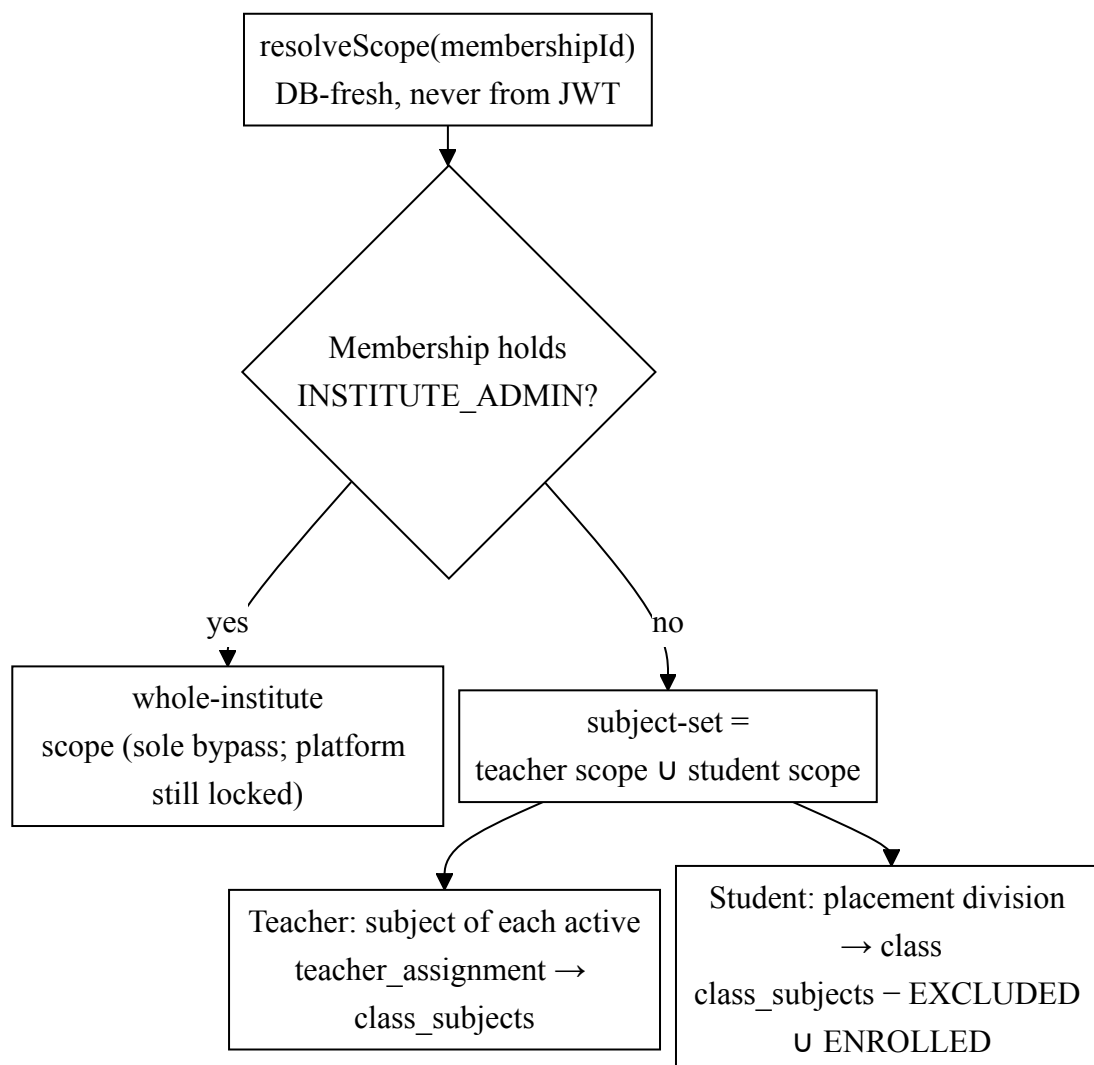

Figure 4.6. Academic scope — resolution of the actor's subject set from database state.

CatLium EduTech — Academic Scope Enforcement on Requests

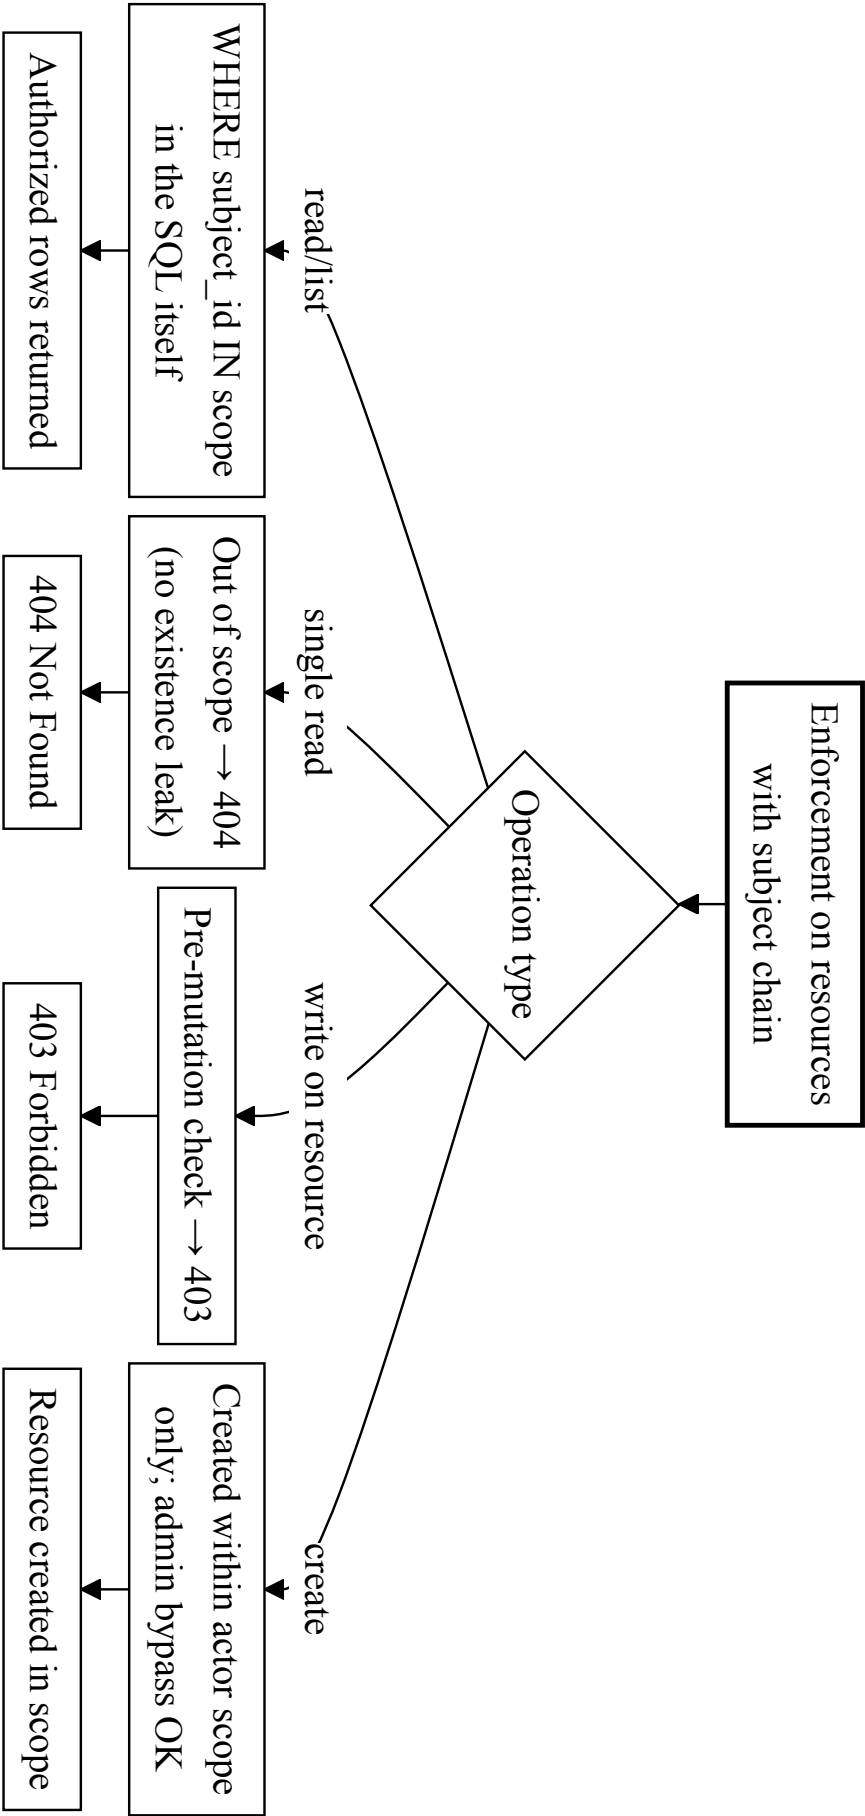

Figure 4.7. Academic scope — enforcement outcomes (reads 404, writes 403).

Chapter 5

Core Features and Workflows

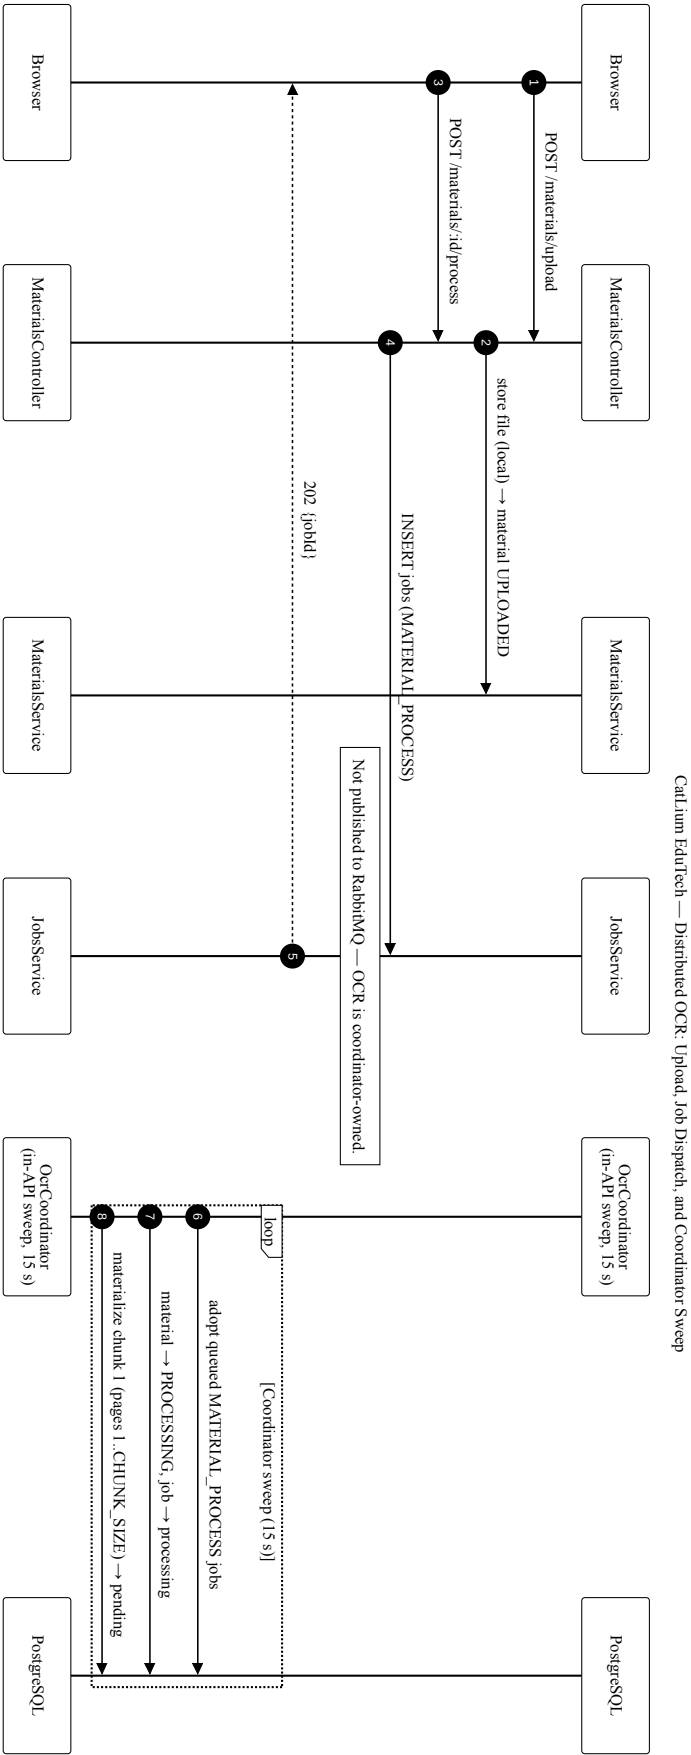

Figure 5.1. Distributed OCR material processing, part 1: upload, job dispatch, and the coordinator sweep.

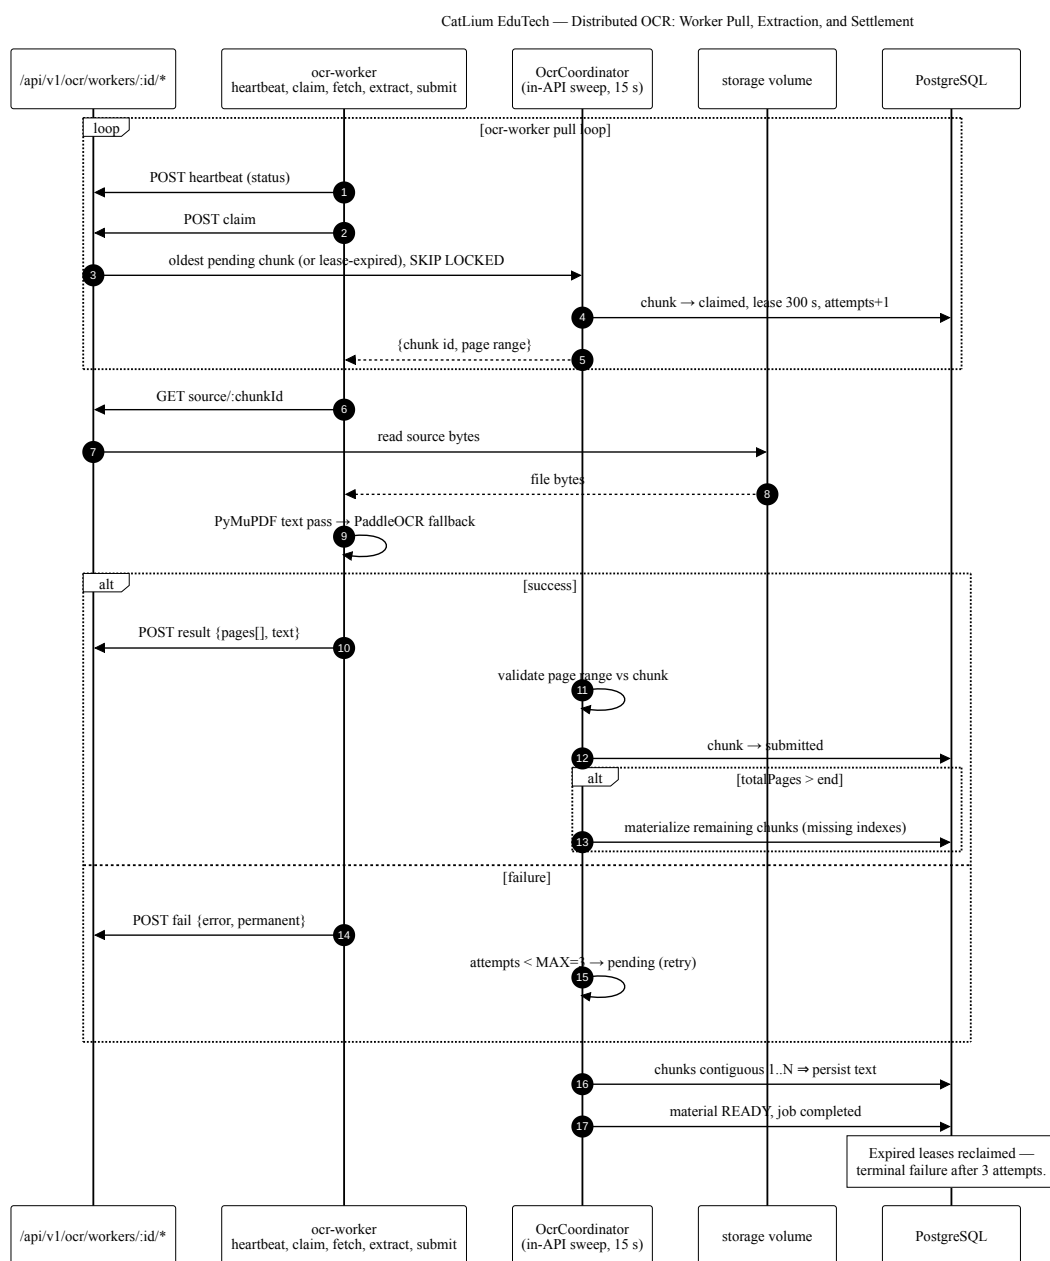

Figure 5.2. Distributed OCR material processing, part 2: worker pull, extraction, and settlement.

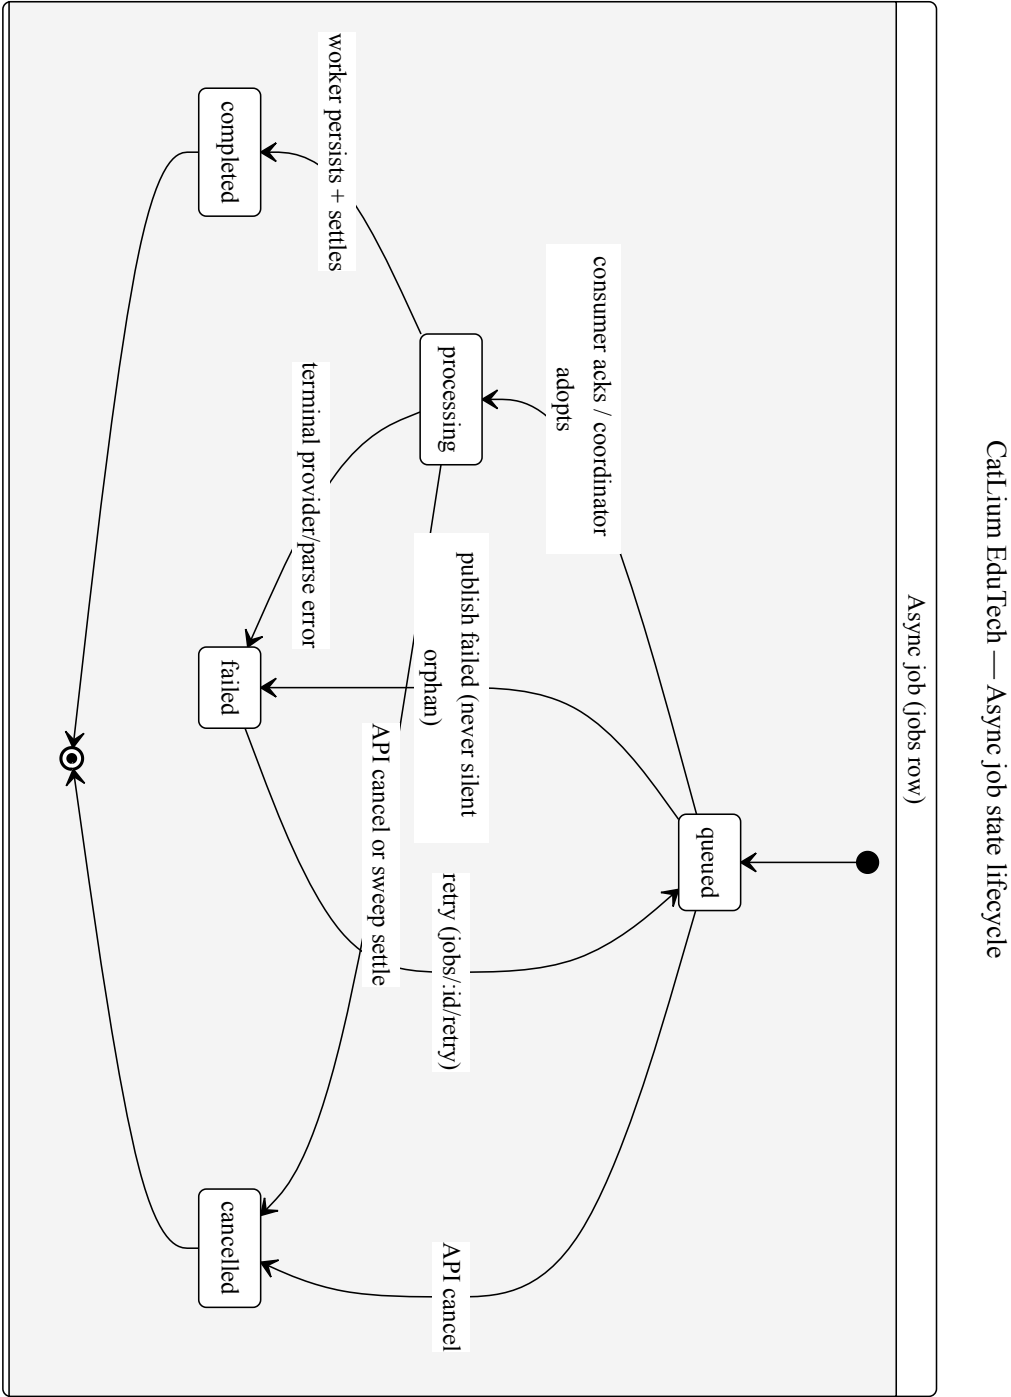

Figure 5.3. Job state lifecycle.

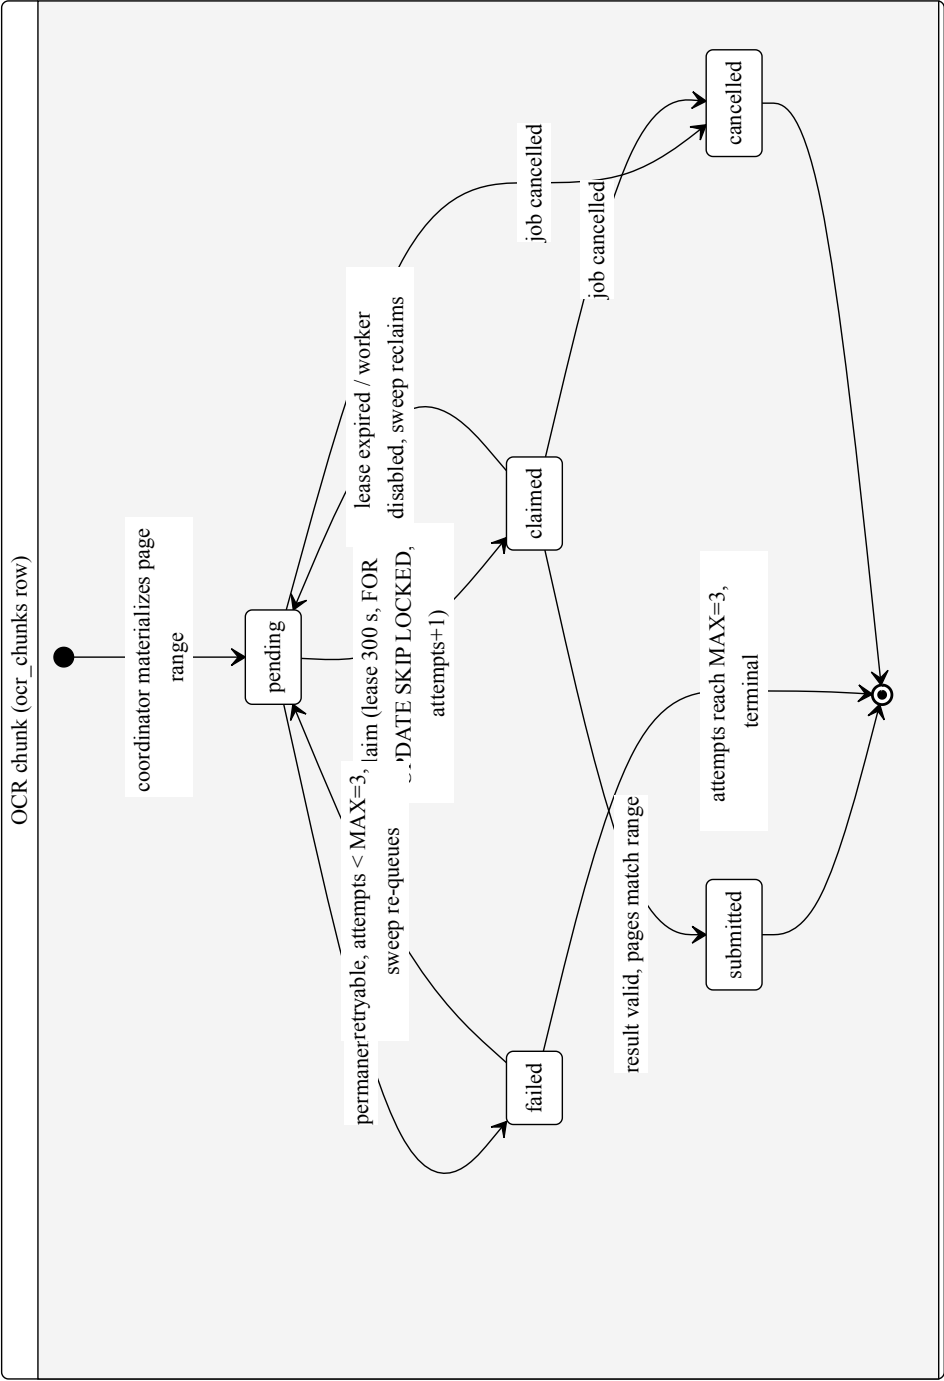

Figure 5.4. OCR chunk state lifecycle.

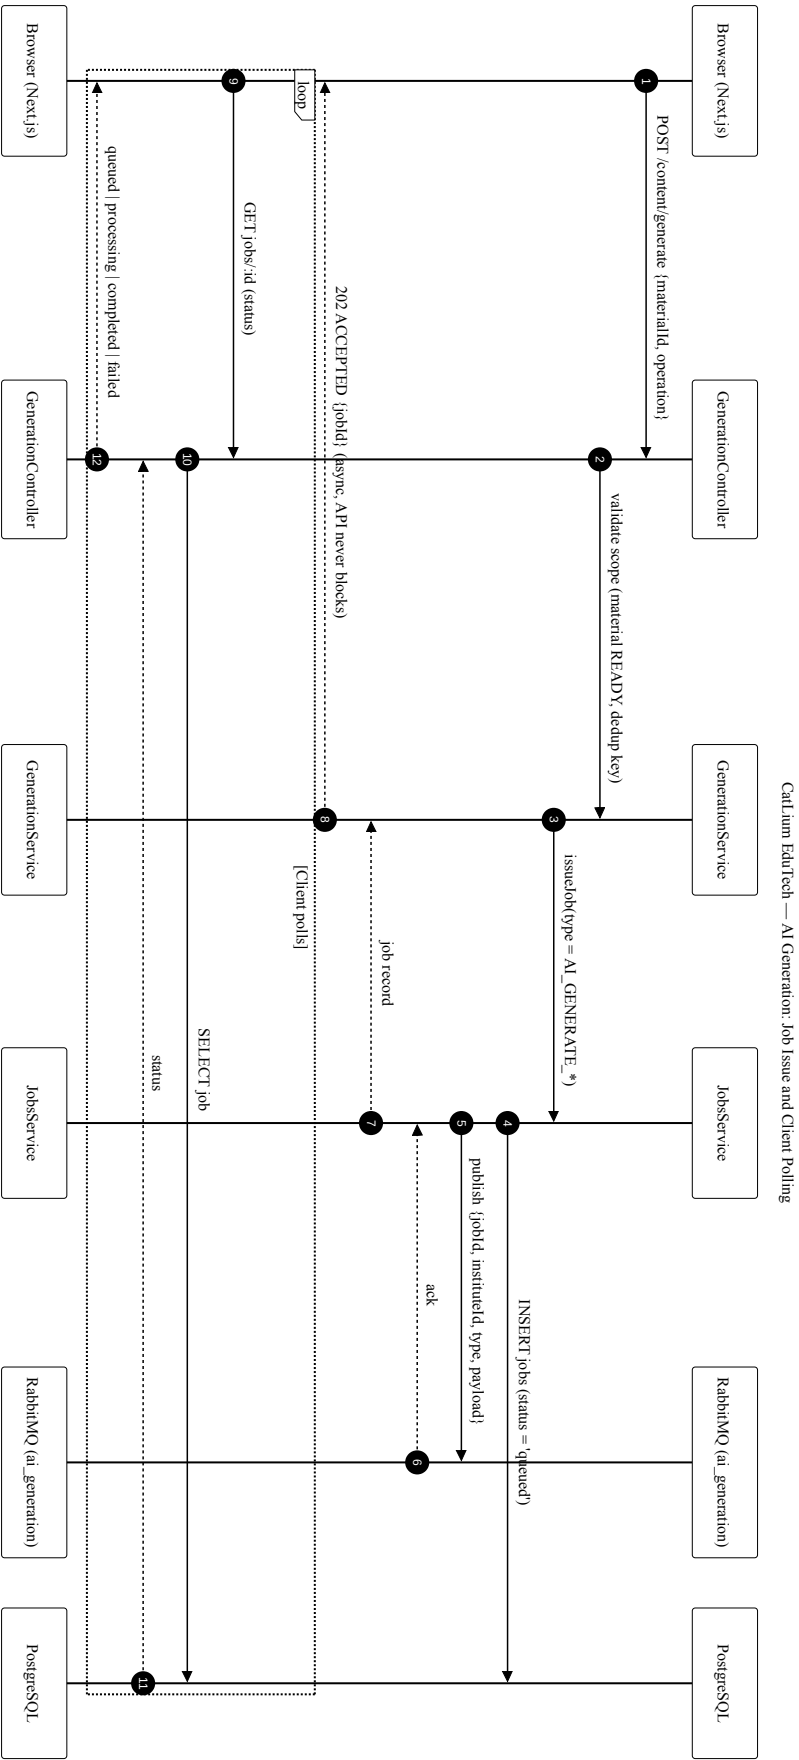

Figure 5.5. Asynchronous AI generation, part 1: job issue and client polling.

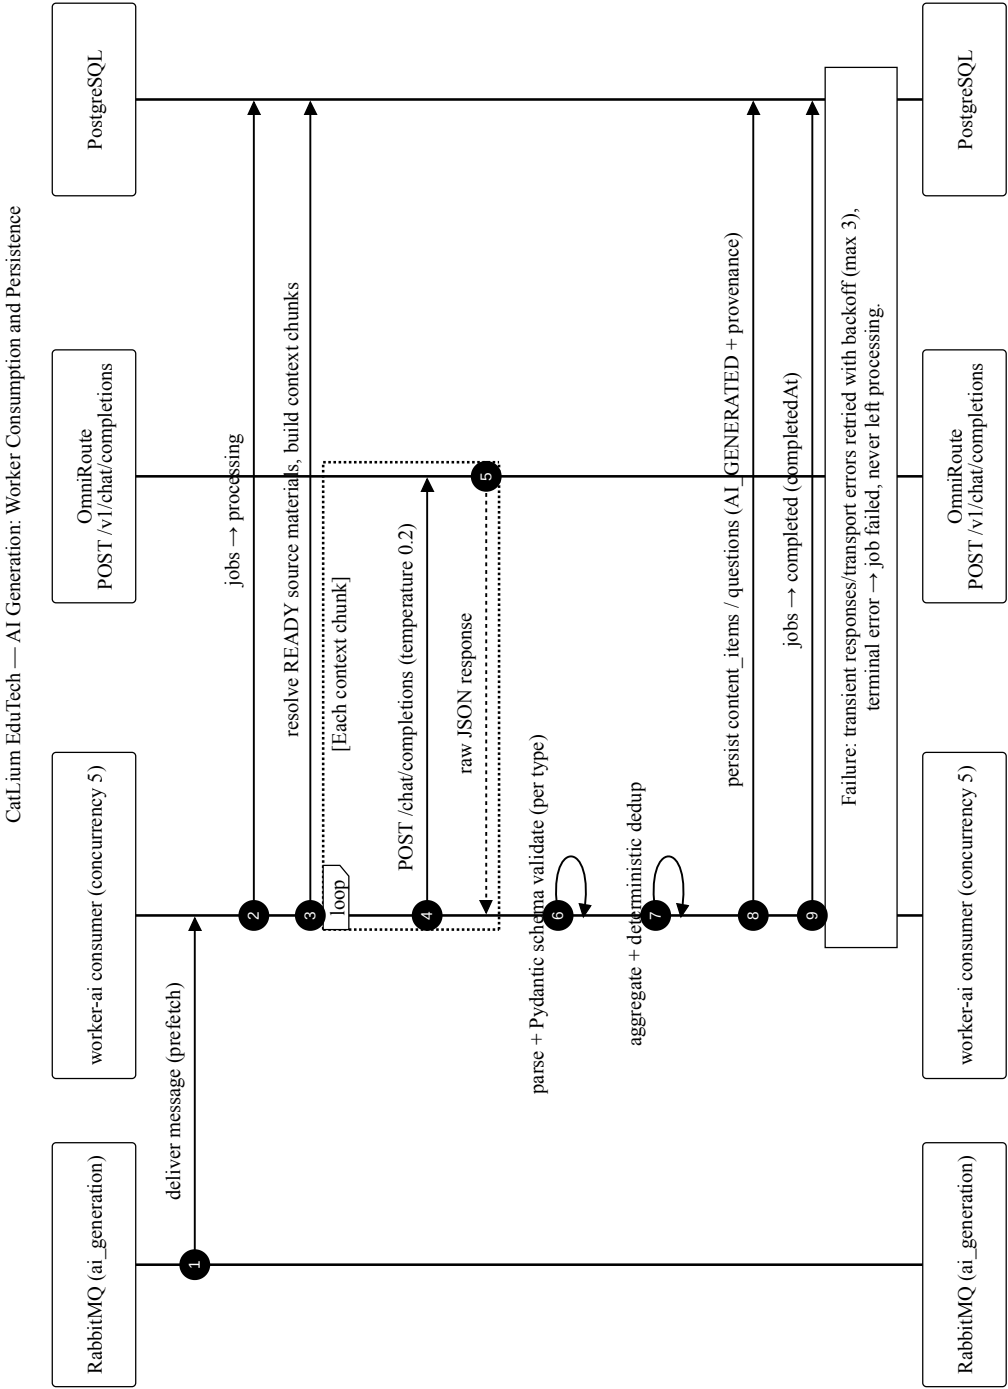

Figure 5.6. Asynchronous AI generation, part 2: worker consumption, OmniRoute calls, and persistence.
